MULTISPECTRUM INFRARED

X3301 Multispectrum Infrared Flame Detector

X3301 Multispectrum Infrared Flame Detector (Spec Sheet: 90-1218, 90-1219) establishes the benchmark in hydrocarbon based fire detection performance and false alarm rejection. The detector utilizes advanced signal processing algorithms supported by an embedded 32-bit microprocessor to provide continuous protection in the presence of false alarm sources and environments with infrared radiation present. Multiple sensitivity and output options are available enabling the X3301 to be used in a variety of applications such as offshore oil/gas platforms. Standard outputs include fire alarm, auxiliary alarm and fault relays, with RS-485 Modbus. Optional 0-20 mA, HART, Pulse, or Eagle Quantum Premier outputs are also available. Hangar Mode processing option provides an increased verification time to a sustained fire while maintaining extended detection range capability. Hangar mode provides additional false alarm rejection capability for applications that contain temporary sources of alarm.

- Model options available that are optimized for Aircraft Hangars, Turbines, and Automotive Paint Spray Booth applications.
- Models available with SIL 2 certification
- Increased detection range compared to traditional detectors
- Third-party certified performance to multiple fuel types
- Terminal block allows for Class X Pathway Designation per NFPA 72
- 125 feet (30.5 m) of detection range on axis for methane
- Microprocessor controlled heated optics enable optimal performance in adverse environments
- Data logger for event time and date stamping
- Automatic **oi** (optical integrity) continuously verifies each sensors ability to detect fire
- **Calibrated** manual testing/magnetic **oi**, no test lamp required
- Four conduit entries for easy installation
- Division Approval Ratings: FM and CSA
- Zone Approval Ratings: FM, CSA, ATEX, and IECEx
- DNV, MED, ULC, USCG
- EN 54 part 10 certified by VdS, LPCB
- Meets Construction Product Directive
- Optional HART output, AMS aware, and FDT/DTM capable
- Models available with integral explosion proof camera option (xWatch)
- Tricolor LED on detector faceplate indicates detector status condition
- Automotive Model meets NFPA 33 response requirements for under 0.5 seconds

*Available only on type 21 & 22 (Automotive) output.

† Compatible with EQP Controller firmware 11.08 and later.

‡ See 95-8735 Hangar Mode Addendum and Consult Factory for Recommendations

Application Guidelines

The following criteria should be considered when choosing a sensitivity level for the intended application:

- Potential for interference from IR emitting sources
- Speed of response based on fuel type and fire size
- Distance between the hazard and the flame detector

These are typical industry application settings. They may not be applicable to all installations. Contact factory for additional application guidance.

Offshore	001, 004
Turbine	010, 001
Compressor	001, 010
Hangar	034 or 035
Petroleum Loading Racks	034
Automotive	005
High IR Backgrounds	004, 010, 034

NOTE: Latching relays cannot be used in voted systems.

Ship Weight: Aluminum = 9lb (4.9kg) Stainless Steel = 16.8lb (7.6kg)						

*The last 3 digits of the part number identify the software configuration. Please see table A1 to choose the correct option.

The standard EQP detectors are completely configurable using the S3 software and are defaulted to the -001 setting.

NOTES: 5 year warranty excludes xWatch camera.

Models listed above come with a 2.3 mm lens on the camera, which emulates the 90° field of view of the flame detector.

See section Flame F for additional lens options.

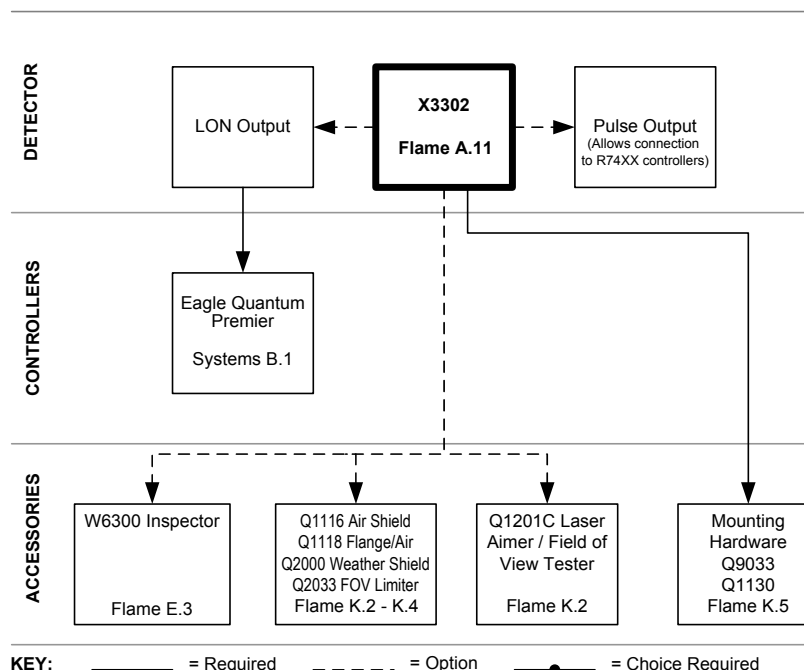

MULTISPECTRUM INFRARED

X3302 Multispectrum Infrared Flame Detector

X3302 Multispectrum Infrared Flame Detector (Spec Sheet: 90-1232) provides a solid field of view for hydrogen fire detection coupled with superior false alarm rejection. The detector utilizes advanced signal processing algorithms supported by an embedded 32-bit microprocessor to provide continuous protection in the presence of false alarm sources and environments with infrared radiation present. When configured for Very High Sensitivity, the X3302 has a detection range of 125 feet on axis and 100 feet off axis to a hydrogen fire and is recommended for any indoor/outdoor application. The detector is available in aluminum or stainless steel. Standard outputs include fire alarm, auxiliary alarm and fault relays, with RS-485 Modbus. Optional 0-20 mA, HART, Pulse, or Eagle Quantum Premier outputs are also available. Pulse output is available for easy retrofitting into Det-Tronics R74XX controller-based systems. Ideal applications include hydrogen storage, aerospace, battery rooms, and filling stations.

- Eagle Quantum Premier model
- Models available with SIL 2 certification
- Multiple sensitivities and certified performance to Hydrogen and Methanol
- Terminal block allows for Class X Pathway Designation per NFPA 72
- 125 feet on axis *and* 100 feet off axis detection range for hydrogen fire
- Microprocessor controlled heated optics, enable optimal performance in adverse environments
- Data logger for event time and date stamping
- Optional HART output, AMS aware, and FDT/DTM capable
- Automatic **oi** (optical integrity) continuously verifies each sensors ability to detect fire
- Calibrated manual testing/magnetic **oi**, no test lamp required
- Four conduit entries for easy installation
- Division Approval Ratings: FM and CSA
- Zone Approval Ratings: FM, CSA, ATEX, and IECEx
- Models available with integral explosion proof camera option (xWatch)
- Tricolor LED on detector faceplate indicates detector status condition

Application Guidelines

The following criteria should be considered when choosing a sensitivity level for the intended application:

- Speed of response based on fuel type and fire size
- Distance between the hazard and the flame detector

These are typical industry application settings. They may not be applicable to all installations. Contact factory for additional application guidance.

Fertilizer (Outdoor), Ammonia, Refrigerants	001
Aerospace, Hydrogen Storage	002
Filling Stations, Turbines	004
Fertilizer (Indoor), Refrigerants, Compressors, Battery Manufacturing	050

NOTE: Latching relays cannot be used in voted systems.

Ship Weight: Aluminum = 7lb (3.2kg) Stainless Steel = 13.8lb (6.3kg)							

*The last 3 digits of the part number identify the software configuration. Please see table A2 to choose the correct option.

The standard EQP detectors are completely configurable using the S3 software and are shipped defaulted to the -002 setting.

ULTRAVIOLET/INFRARED

X5200 UVIR Flame Detector

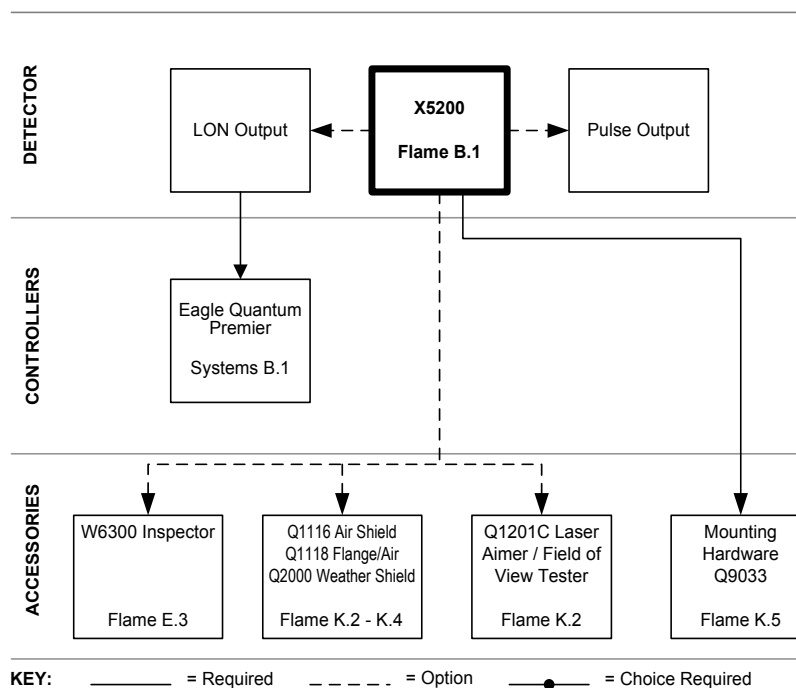

X5200 UVIR Flame Detector (Spec Sheet: 90-1156) meets the most stringent requirements worldwide with advanced ultra high speed detection capabilities and immunity to extraneous sources, combined with a superior mechanical design. The combination of Arc Rejection on the UV sensor and TDSA/Quick Fire on the IR sensor make this detector the highest false alarm immune UVIR available. The mounting arrangement allows the UV and IR sensors to monitor the same hazardous location with a 90-degree field of view. When both sensors simultaneously detect the presence of a flame, an alarm signal is generated.

The standard output configuration includes fire, fault, and auxiliary relays with RS-485 Modbus. Optional 0-20 mA, Eagle Quantum Premier, or HART outputs are also available. Auxiliary relay offers the flexibility to customize detection, using UV, IR, or both. A model with pulse output is available for easy retrofitting into existing Det-Tronics controller based systems.

The X5200 housing is available in aluminum or stainless steel, with NEMA/Type 4X and IP66/IP67 rating. Typical applications include paper machines, munitions, petrochemical applications, and aerosol filling.

- Eagle Quantum Premier and Eagle Quantum compatible models available
- Models available with SIL 2 certification
- Responds to a fire in the presence of modulated blackbody radiation (i.e., heaters, ovens, turbines) without false alarm
- Ultra high speed capability
- Optional HART output, AMS aware, and FDT/DTM capable
- Heated optics for increased resistance to moisture and ice
- Automatic, manual, or magnetic **o_i** (optical integrity)
- FM, CSA, ATEX, and IECEx
- EN 54 part 10 certified by BRE, LPCB
- Meets Construction Product Directive
- Configurable auxiliary relay allows independent alarm signaling
- Terminal block allows for Class X Pathway Designation per NFPA 72
- EMI, RFI, EMC Directive Compliant
- Built-in data logging / event monitoring
- Meets NFPA 33 response requirement for under 0.5 seconds (when model selected)
- Models available with integral explosion proof camera option (xWatch)
- Tricolor LED on detector faceplate indicates detector status condition

-022	Very High	Off	Very High	TDSA or Quick	De-Energized Non-Latching	UV or IR	Off	TDSA or Quick	De-Energized Non-latching	Energized Non-latching

*Available only on the X5200M model

ARC = Arc Rejection. An algorithm that prevents false alarms from transient UV sources

TDSA = "Time Domain Signal Analysis" proprietary signal processing algorithm for superior IR false alarm rejection

Quick = Signal processing for explosive IR events

Application Guidelines

The following criteria should be considered when choosing a sensitivity level for the intended application:

- Speed of response based on fuel type and fire size
- Distance between the hazard and the flame detector

These are typical industry application settings. They may not be applicable to all installations. Contact factory for additional application guidance.

X5200M UVIR Flame Detector - Moly

The X5200M UV/IR detector utilizes a molybdenum (moly) sensing element. Moly-based sensors have an increased spectral range of 1850 to 2650 angstroms, which is better suited for detecting substances with unusual chemistry and some black powders.

Ship Weight: Aluminum = 9lb (4.1kg) Stainless Steel = 17.6lb (7.9kg)						

*The last 3 digits of the part number identify the software configuration. Please see table B1 to choose the correct option.

The standard EQP detectors are completely configurable using the S3 software and are defaulted to the -001 setting.

NOTES: 3 year warranty excludes xWatch camera.

Models listed above come with a 2.3 mm lens on the camera, which emulates the 90° field of view of the flame detector.

See section Flame F for additional lens options.

SINGLE FREQUENCY INFRARED

X9800 Single Frequency IR Flame Detector

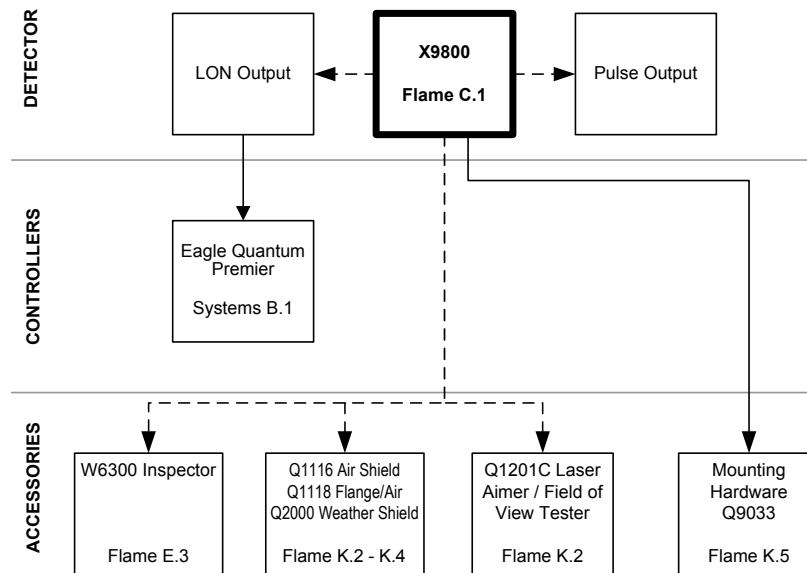

The **X9800 IR Flame Detector** (Spec Sheet: 90-1160) meets the most stringent requirements worldwide with advanced detection capabilities and immunity to extraneous sources, combined with a superior mechanical design. The detector is equipped with dual signal processing (Quick Fire high speed operation and Time Domain Signal Analysis) and automatic/magnetic manual **o_i** (optical integrity) test capability. The detector has Division and Zone explosion-proof ratings and is suitable for use in indoor and outdoor applications.

The standard output configuration includes fire, fault, and auxiliary relays with RS-485 Modbus. Optional 0-20 mA, Pulse, Eagle Quantum Premier, or HART outputs are also available. A model with pulse output is available for easy retrofitting into existing Det-Tronics R74XX controller-based systems.

The X9800 housing is available in aluminum or stainless steel, with NEMA/Type 4X and IP66/IP67 rating. Typical applications include: printing, petrochemical, automotive, and dirty environments.

- Eagle Quantum Premier model
- Models available with SIL 2 certification
- Unequaled false alarm rejection, TDSA
- Tricolor LED on detector faceplate indicates detector status condition
- Ultra High speed capability
- Microprocessor-controlled heated optics for increased resistance to moisture and ice
- Automatic, manual, or magnetic **o_i** testing
- Optional HART output and AMS aware
- Tricolor LED indicates normal operation, fire, and fault conditions
- FM, CSA, ATEX, and IECEx
- EN 54 part 10 certified by BRE, LPCB
- Mounting arm allows easy sighting
- Integral wiring compartment for ease of installation
- Terminal block allows for Class X Pathway Designation per NFPA 72
- Meets NFPA 33 response requirement for under 0.5 seconds (available when model selected)
- Built-in data logging / event monitoring
- Models available with integral explosion proof camera option (xWatch)

-008	High	TDSA or Quick	De-Energized Latching	Follows Alarm	TDSA or Quick	De-energized Latching	Energized Non-latching
-009	Very High	TDSA or Quick	De-Energized Latching	Follows Alarm	TDSA or Quick	De-energized Latching	Energized Non-latching
-010	Very High	TDSA	De-Energized Latching	Follows Alarm	TDSA	De-energized Latching	Energized Non-latching
-011	High	TDSA or Quick	De-Energized Latching	Independent	Quick	De-energized Latching	Energized Non-latching
-012	Low	TDSA	De-Energized Latching	Follows Alarm	TDSA	De-energized Latching	Energized Non-latching
-013	High	Quick	De-Energized Non-Latching	Pre-Alarm	None	Energized Non-Latching	Energized Non-latching

TDSA = "Time Domain Signal Analysis" proprietary signal processing algorithm for superior IR false alarm rejection

Quick = Signal processing for explosive IR events

Application Guidelines

The following criteria should be considered when choosing a sensitivity level for the intended application:

- Speed of response based on fuel type and fire size
- Distance between the hazard and the flame detector

These are typical industry application settings. They may not be applicable to all installations. Contact factory for additional application guidance.

Offshore	001
Compressor	002
High Speed	003
Powder Coating	013
Automotive	005
Printing	001

NOTE: Latching relays cannot be used in voted systems.

Ship Weight: Aluminum = 9lb (4.1kg) Stainless Steel = 17.6lb (7.9kg)						

*The last 3 digits of the part number identify the software configuration. Please see table C1 to choose the correct option.

The standard EQP detectors are completely configurable using the S3 software and are defaulted to the -001 setting.

NOTES: 3 year warranty excludes xWatch camera.

Models listed above come with a 2.3 mm lens on the camera, which emulates the 90° field of view of the flame detector.

See section Flame F for additional lens options.

ULTRAVIOLET

X2200 UV Flame Detector

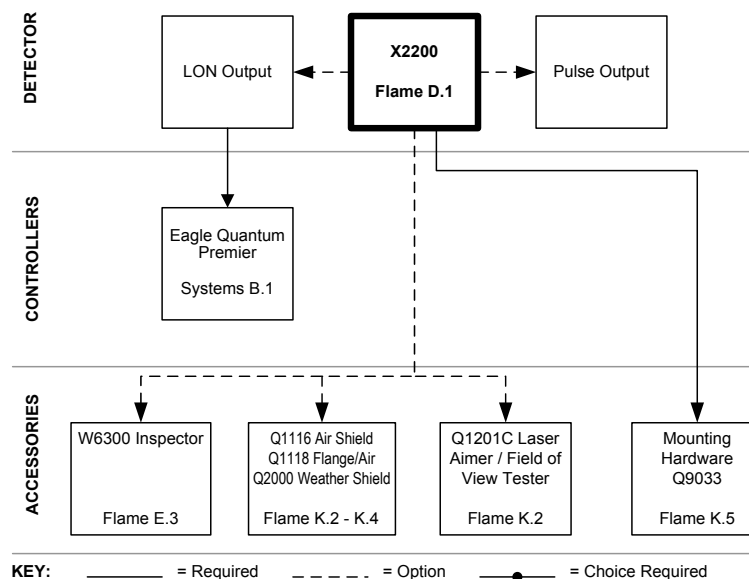

X2200 UV Flame Detector (Spec Sheet: 90-1157) meets the most stringent requirements worldwide with advanced signal processing and immunity to extraneous sources, combined with Ultra-high speed capability. The detector is equipped with both automatic and manual σ_i (optical integrity). The detector has Division and Zone explosion-proof ratings and is suitable for use in a variety of applications.

The standard output configuration includes fire, fault, and auxiliary relays with RS-485 Modbus. Optional 0-20 mA, Pulse, Eagle Quantum Premier, or HART outputs are also available. A model with pulse output is available for easy retrofitting into existing Det-Tronics R74XX controller based systems.

The X2200 housing is available in aluminum or stainless steel, with NEMA/Type 4X and IP66/IP67 rating. Typical applications include: HVDC converter stations, munitions, sulfur production, and silane storage.

- Eagle Quantum Premier and Eagle Quantum compatible models available
- Models available with SIL 2 certification
- ARC rejection - Advanced signal processing
- Unequaled false alarm rejection - Solar blind
- Responds to a fire in the presence of modulated blackbody radiation without false alarm
- Ultra-High speed capability
- Optional HART output and AMS aware
- Automatic, manual, or magnetic σ_i (optical integrity) testing
- Pulse output for compatibility with Det-Tronics R74XX controller-based systems (optional)
- FM, CSA, ATEX, CE, and IECEx
- EN 54 part 10 certified by BRE, LPCB
- Tricolor LED indicates normal operation, fire, and fault conditions
- Mounting arm allows easy sighting
- Integral wiring compartment for ease of installation
- Terminal block allows for Class X Pathway Designation per NFPA 72
- Meets NFPA 33 response requirement for under 0.5 seconds (available when model selected)
- EMI, RFI, EMC Directive Compliant
- Built-in data logging / event monitoring
- Models available with integral explosion proof camera option (xWatch)
- Molybdenum Model available for applications that require increased spectral sensitivity

-019	Very High	Off	De-Energized Non-latching	Pre-Alarm	De-Energized Non-latching	Energized Non-latching

*Available only on the X2200M model

ARC = Arc Rejection. An algorithm that prevents false alarms from transient UV sources

Application Guidelines

The following criteria should be considered when choosing a sensitivity level for the intended application:

- Speed of response based on fuel type and fire size
- Distance between the hazard and the flame detector

These are typical industry application settings. They may not be applicable to all installations. Contact factory for additional application guidance.

HVDC	019
Compressor	002
High Speed	003
Automotive	005
Turbine	006
Munitions	013/019

NOTE: Latching relays cannot be used in voted systems.

X2200 UV Flame Detector - Moly - SIL 2

The X2200M UV detector utilizes a molybdenum (moly) sensing element. Moly-based sensors have an increased spectral range of 1850 to 2650 angstroms, which is better suited for detecting substances with unusual chemistry, sulfur fires, and some black powders.

ULTRAVIOLET

X2200GM UV Flame Detector - Moly

In addition to having a Kr-85 free source tube, the X2200GM UV Flame Detector utilizes a molybdenum (moly) sensing element. Moly-based sensors have an increased spectral range of 1850 to 2650 angstroms, which is better suited for detecting substances with unusual chemistry, sulfur fires, and some black powders.

O-ring - Rear Cover	107427-040	Viton	<1 lb (<0.45 kg)
O-ring - Rear Cover	104346-154	Fluorosilicone (blue)	<1 lb (<0.45 kg)

NOTE: Not interchangeable - Reference instruction manual 95-8530 to determine the correct oi replacement plate.

Accessories

W6300B Inspector Connector with Flame Inspector Software (Manual: 95-8751) for use with X3301, X3302, X5200, X9800, and X2200 flame detectors. Allows for validation of configuration and uploading of important detector status data such as power-up/down, faults and alarms to a personal computer (PC) where it can be displayed, saved and/or printed. Inspector Monitor CD included

W6300 Inspector Connector - X-Series

Model/Description	Part Number	Converter	Ship Weight
W6300B1003 (120/220 Vac)	007819-002	USB	<1 lb (<0.46 kg)
Replacement Converter RS485 to USB	103881-001	USB	<1 lb (<0.46 kg)
Flame Inspector CD	009207-001	N/A	<1 lb (<0.46 kg)

X-SERIES FLAME DETECTOR SPARE PARTS & ACCESSORIES

X-Series Miscellaneous Accessories

Description	Part Number	Ship Weight
Magnet*	102740-002	<1 lb (<0.45 kg)
Magnet and Adapter for Extension Pole	008082-001	<1 lb (<0.45 kg)
Magnet and Extension Pole (6ft to 13ft)	007739-001	2 lb (.91 kg)
Magnet and Extension Pole (8ft to 22ft)	007739-002	4 lb (1.81 kg)
14mm Hex Wrench	103363-001	<1 lb (<0.45 kg)
Screwdriver	103406-001	<1 lb (<0.45 kg)
1 oz grease for detectors (non-silicon)	005003-001	<1 lb (<0.45 kg)
Black Static Cap for oi Calibration	102991-001	<1 lb (<0.45 kg)
Window cleaner (6 pack)	001680-001	<1 lb (<0.45 kg)

*1 magnet ships with each individual order of X-Series detectors, free of charge.

**14mm Hex Wrench

EXPLOSION-PROOF SURVEILLANCE CAMERA

X7050 xWatch® Explosion-Proof Surveillance Camera

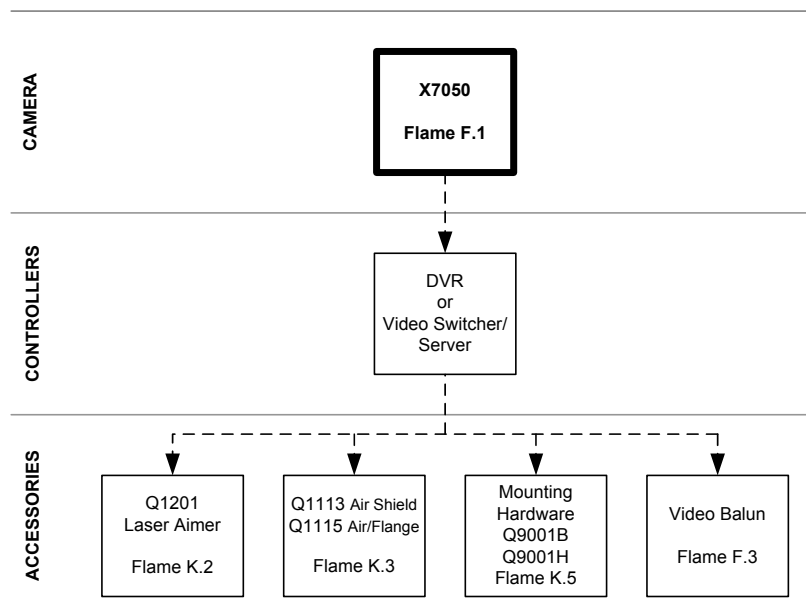

X7050 xWatch Explosion-Proof Surveillance Camera (Spec Sheet 90-1193) An explosion-proof surveillance camera providing high-resolution color images of activity in the monitored area, which allows the capture and recording of fires and other activities on video. When a detector goes into alarm, the operator can immediately view the monitored area in real time and accurately assess the risk and location of the fire. The camera can be used with any video switcher or server for a live video feed and the output can be directed to a DVR or computer monitor.

- xWatch camera features:
- Easy connection to a video switcher using twisted pair wiring
- Existing wiring can be used in most applications
- FM, CSA, ATEX, and IECEx
- Three lens choices for field of view requirements
- Retrofit into a standard C7050 housing by simply replacing the tube module with the DE2020 camera module

Three configurations are available:

- As a stand-alone device to perform typical CCTV functions
- Retrofitted into a C7050 Detector, replacing the UV tube module with the camera module
- Ordered as a combined unit with any of the X-Series Flame Detectors (see flame detector sections for specific models) - FM/CSA.

KEY: — = Required - - - - = Option ● = Choice Required

000499-132	Screw Terminal Balun, Active , converts single composite CCTV video signal from CAT-5 twisted pair wiring to BNC coaxial connector on DVR or video multiplexer, active type, suitable for distances over 750 ft (0.23 km)	<1 lb (<0.45 kg)
000499-073	Screw Terminal Balun, Passive , converts single composite CCTV video signal from CAT-5 twisted pair wiring to BNC coaxial connector on DVR or video multiplexer, passive type, suitable for distances up to 750 ft (0.23 km)	<1 lb (<0.45 kg)

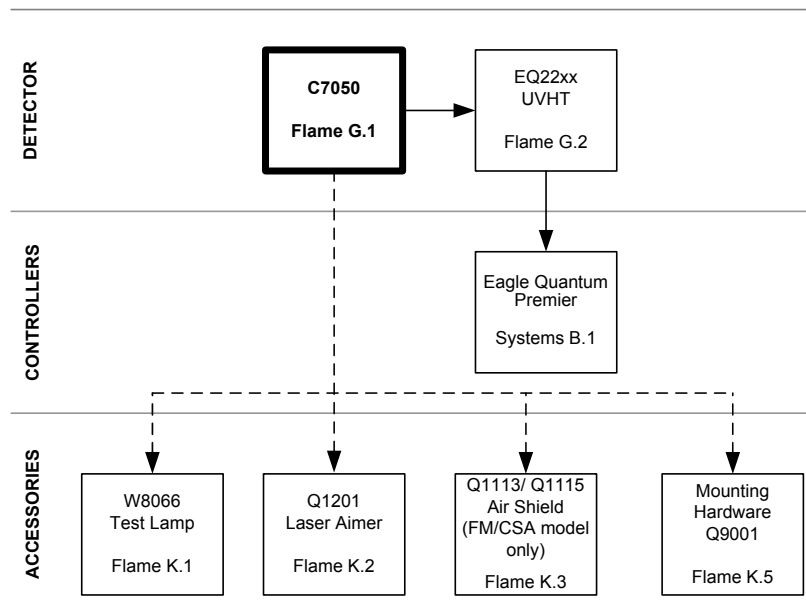

ULTRAVIOLET

C7050B Detector

C7050B UV Flame Detector (Manual: 95-8214) combined with the EQ2200UVHT (95-8570) on an Eagle Quantum Premier system (or as a replacement on legacy Eagle Quantum system) provides fast, reliable flame detection in a wide variety of applications. The detector has the Automatic **oi** (optical integrity) feature, providing a continuous check of detector optical surfaces, detector sensitivity, and electronic circuitry of the detector/controller system. Not recommended for applications where welding or lightning may be present.

- Replaceable tube module
- External Automatic **oi**
- Internal Automatic **oi**
- Standard temperature option
- High temperature option, 125°C continuous duty
- Variable sensitivities available to match hazard
- FM, CSA, ATEX, and IECEx

EQ2217UVHT	007082-004	SS	M25/M20	N/A	X	9.5 lb (4.3 kg)

One (1) Electronic Module (EQxxxxUVHT) is required for use with each C7050B Detector

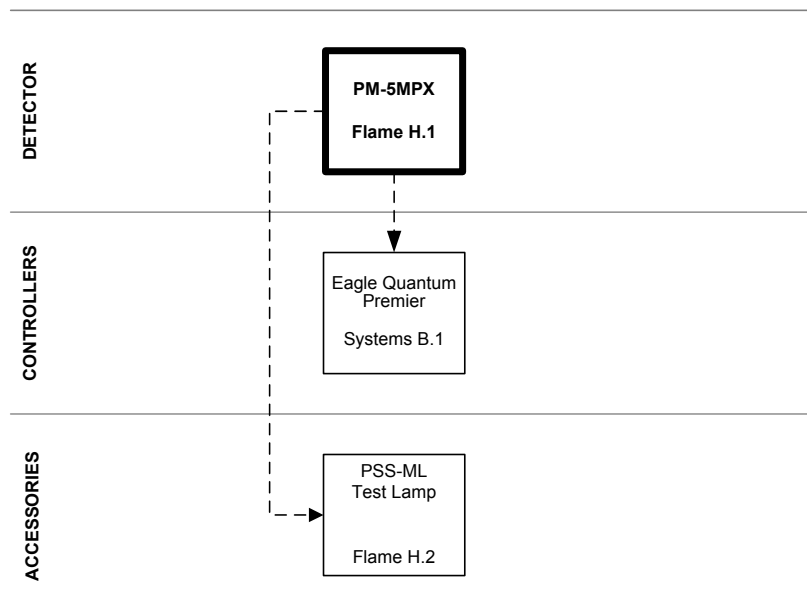

DUAL SPECTRUM INFRARED

PM-5MPX Dual Spectrum Flame Detector

PM-5MPX Dual Spectrum Flame Detector (Spec Sheet: 90-1182) is optimized for the rigorous semiconductor fabrication industry, which is beset with many hazards that result in stringent and application-specific requirements for fire protection safety systems. Additionally, the PM-5MPX is well-suited for the detection of cutting oil fires within CNC machine grinding applications.

- Complies to FM wet bench performance standards
- Approved to FM3260: 2000
- Dual spectrum IR design
- Compact size
- LED indicator for operational status
- Built-in mounting plate
- Typical response of <0.5 sec
- Fast response—as fast as 25 milliseconds
- Polypropylene housing: excellent resistance to corrosion and contamination effects
- FM approved for intrinsic safety
- CE marked
- Highly resistant to false alarms
- May qualify for RoHS machine guarding exception

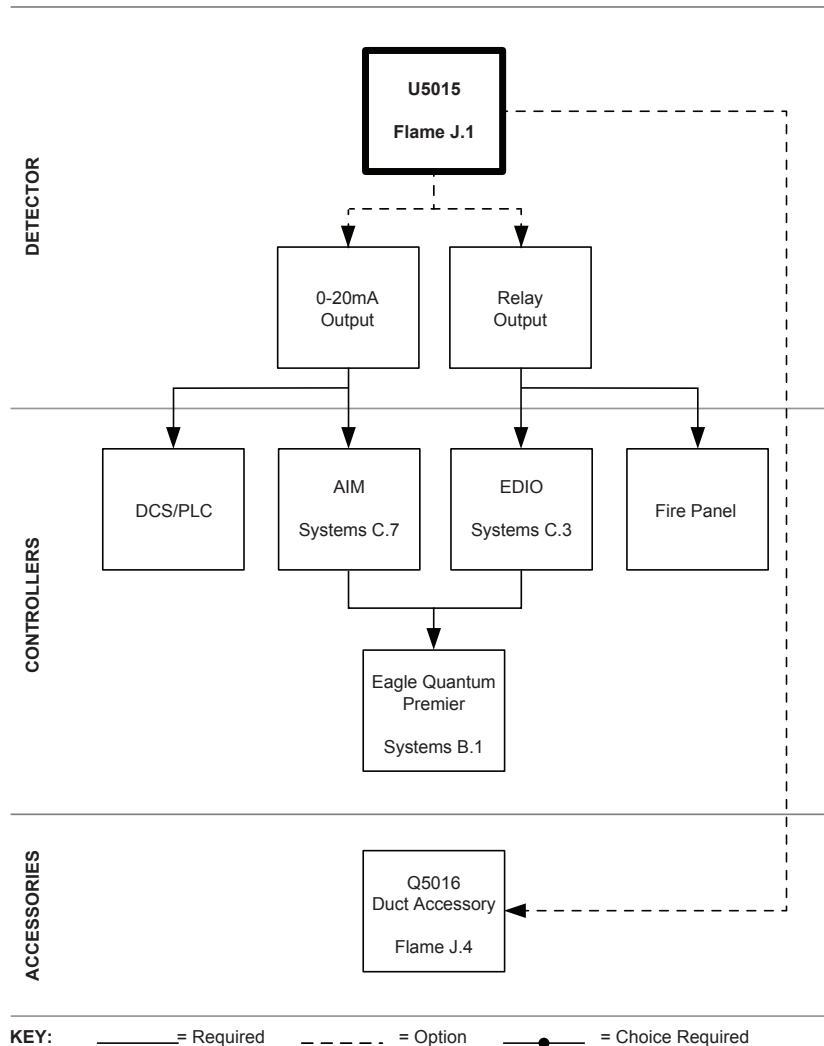

SMOKE DETECTORS

U5015 Explosion Proof Smoke Detector

U5015 Explosion Proof Smoke Detector (Spec Sheet: 90-1217) The U5015 Explosion Proof Smoke Detector has Division and Zone explosion-proof ratings and is suitable for industrial and commercial applications. The detector is designed to operate effectively with both smoldering and rapidly growing fires, and will annunciate a fault condition ensuring no undisclosed failures. The U5015 Explosion Proof Smoke Detector outputs include 0-20 mA, a localized LED, and relays.

- FM Approved for use in Class I, Division 1 and Class I, Zone 1 hazardous locations
- FM Approved for smoke detection performance (FM 3230)
- IECEx Zone approved
- Trouble-free photoelectric operation
- 0-20 mA output for DCS integration
- Self-checking circuitry ensures reliable smoke detection
- Alarm, Auxiliary and Fault relays for controlling annunciating devices or fire panel interface
- LED provides a visual indication that an alarm has occurred
- IP44 ingress protection level suitable for onshore or offshore requirements

Q5016 Duct Mount Accessory

Q5016 Duct Mount Accessory (Instruction Manual: 95-8752) is used with the U5015 explosion proof smoke detector to detect smoke within air handling duct work. Mounted to the exterior of the duct wall, the Q5016 utilizes the differential pressure created between the inlet (sampling) and outlet (exhaust) tubes to drive a continuous air sample through the measurement chamber. The Q5016 is designed for hazardous industrial and commercial applications. Also available in red epoxy painted option.

- Air Velocity Range of 300 to 4000 ft/min (91.4 to 1219 meters/min)
- NEMA 250 Type 4X
- All aluminum surfaces are coated with chemical film per MIL-DTL-5541 TYPE II Class 1A and ISO 8081

Q5016 Duct Mount Accessory

Model	Part Number	Inlet Tube Length
Q5016-1	013901-001	1 ft (0.3 m)
Q5016-3	013901-003	3 ft (0.9 m)
Q5016-6	013901-006	6 ft (1.8 m)

ACCESSORIES

Test Lamps

W8066 UV Test Lamp (Spec Sheet: 90-1055) is used for on-site testing of all UV detector types. It replaces W866. Consists of a UV lamp powered by a replaceable 9 volt battery and is contained in a plastic enclosure. Intrinsically safe. "G" version available Kr85 Free.

W867 Explosion-Proof UVIR Test Lamp (Spec Sheet: 90-1055) is used for on-site testing of UV, single frequency IR, or UVIR detectors. Consists of a high-energy broad band lamp powered by rechargeable batteries and is contained in an explosion-proof non-ferrous metallic enclosure.

W8067 Test Lamp (Manual: 95-8626) for on-site testing of the UVIR and single frequency IR detectors.
NON EXPLOSION-PROOF - CANNOT BE USED IN HAZARDOUS LOCATIONS.

Laser, Laser Aimer Holder

Laser Aimer is for use with the Q1201A and Q1201C Laser Holder in sighting and testing the area of flame detection coverage. When used with its holder, the laser beam identifies the center and edges of the detector's field of view (FOV). **NEW! Green laser available, for greater visibility. Preferred for most applications.** Includes battery.

Q1201A Laser Aimer Holder (Manual: 95-8404) is for use with the Laser Aimer for sighting and testing area of flame detection coverage. Easily attaches to the front of Det-Tronics legacy model UV, single frequency IR and UVIR detectors for use during system startup, checkout, and re-alignments.

Q1201C Laser Aimer Holder (Manual: 95-8596) is for use with X3301, X3302, X5200, X9800, X2200, and X3300 flame detectors. Designed to hold the Laser Aimer to show exact location of the center of the detector's FOV. Two additional holding positions are available for locating the outside edges of the FOV at either 30 degrees off center (75 degrees total FOV) or at 45 degrees off center (90 degrees total FOV). While the Laser Aimer is being used to locate edges of the FOV it can be rotated 360 degrees to identify the entire area of flame detection coverage.

Q1201C Accessory is used with the Q1201C to determine the top aim point of the flame detector when a 10 or 20 degree FOV sight limiter is to be installed.

Laser, Laser Aimer Holder

Model/Description	Part Number	For Use With	Ship Weight
Red Laser Aimer	006097-001	Q1201A, B, and C	1 lb (0.46 kg)

Flame Detector Hardware

Q1113A Universal Air Shield Assembly (Manual: 95-8321). Use on UV, IR, and UVIR detectors (C7050A, B and H, C7051, C7052, C7098, U7600, U7602 and U7698) in areas with airborne contamination. Consists of Delrin (solvent-resistant plastic) air shield housing with bronze sintered air diffuser. Quick connect air line fitting accepts 1/4 inch OD nylon tubing for instrument grade air supply of 5 to 15 psi at 3 or more cubic feet per minute. Easy to install on existing detectors.

Q1113 Universal Air Shield Assembly

Model	Part Number	Air Connection	Air Supply	Air Requirement	Ship Weight
Q1113A1001	004273-002	1/4" OD nylon tubing	5-15 psi	3 cfm minimum	1 lb (0.45 kg)

Q1115 Universal Air Shield/Flange Mount Assembly (Manual: 95-8467). Use on UV and IR detectors (C7050B, C7098, U7600, U7602 and U7698) in areas with air-borne contaminants. Available in either aluminum or stainless steel with a sintered air diffuser. Quick connect air line fitting accepts 1/4 inch OD nylon tubing for instrument grade air supply of 5 to 15 psi at 3 or more cubic feet per minute.

Q1115 Universal Air Shield / Flange Mount Assembly

Model	Part Number	Material	Air Connection	Air Supply	Air Requirement	Ship Weight
Q1115A1001	006528-001	SS	1/4" OD nylon tubing	5-15 psi	3 cfm minimum	2 lb (0.9 kg)
Q1115A1002	006528-002	AL	1/4" OD nylon tubing	5-15 psi	3 cfm minimum	1 lb (0.45 kg)

Q1116 Universal Air Shield Assembly (Manual: 95-8597). Use on all X-Series flame detectors in areas with air-borne contaminants. Available in aluminum with a sintered air diffuser. Quick connect air line fitting accepts 1/4 inch OD nylon tubing for instrument grade air supply of 12 to 20 psi at 3 or more cubic feet per minute.

Q1116 Universal Air Shield Assembly

Model	Part Number	Air Connection	Air Supply	Air Requirement	Ship Weight
Q1116A1001	007240-001	1/4" OD nylon tubing	12-20 psi	3 cfm minimum	2 lb (0.9 kg)
N/A	011990-001	Q1116/Q1118 SINTER REPLACEMENT KIT			2 lb (0.9 kg)

Flame Detector Hardware

Q1118 Universal Air Shield/Flange Mount Assembly (Manual: 95-8595). Use on all X-Series flame detectors in areas with air-borne contaminants. Available in either aluminum or stainless steel with a sintered air diffuser. Quick connect air line fitting accepts 1/4 inch OD nylon tubing for instrument grade air supply of 10 to 20 psi at 3 or more cubic feet per minute.

Q1118 Universal Air Shield / Flange Mount Assembly

Model	Part Number	Material	Air Connection	Air Supply	Air Requirement	Ship Weight
Q1118A1001	007818-001	AL	1/4" OD nylon tubing	10-30 psi	3-20 cfm target	2 lb (0.9 kg)
Q1118S1001	007818-002	SS	1/4" OD nylon tubing	10-30 psi	3-20 cfm target	6 lb (2.75 kg)
N/A	011990-001	Q1116/Q1118 SINTER REPLACEMENT KIT				2 lb (0.9 kg)

NOTE: Not compatible with Q9033

Q1198 Dual Air Shield/Flange Mount Assembly (Manual: 95-8598). Use on X9800 in areas with high levels of powdered air-borne contaminants. Available in Aluminum with a sintered air diffuser. Provided with two quick connect air line fittings - one for constant air flow function and the second for quick clean/purge function. Both fittings accept 1/4 inch OD nylon tubing for instrument grade air supply of 10 to 60 psi at 3 or more cubic feet per minute.

Q1198 Dual Air Shield / Flange Mount Assembly for X9800

Model	Part Number	Material	Air Connection	Air Supply	Air Requirement	Ship Weight
Q1198A1001	009199-001	AL	6mm OD nylon tubing	10-20 psi	3-5 cfm min	2 lb (0.9 kg)

NOTE: Not compatible with Q9033

ACCESSORIES

Flame Detector Mounting Hardware

Q9001B (Manual: 95-8338) Aluminum swivel for positioning the C7050 and X7050.

Q9001H (Manual: 95-8338) Stainless steel swivel for positioning the C7050 and X7050.

Q9033A Aluminum Mounting Arm for all aluminum X-Series flame detectors.

NOTE: For use with aluminum detectors only.

Q9033B Stainless steel Mounting Arm for all X-Series flame detectors (DNV approved with X3301).

NOTE: For use with stainless steel and aluminum detectors.

Q9033 Collar Attachment (Manual: 95-8686) for all X-Series flame detectors . Used in conjunction with the Q9033A/B Mounting Arm. The Collar Attachment adds versatility to the mounted detector by allowing a wider (3-dimensional) range of motion and improved viewing angles (DNV approved with X3301).

Q1130 (Manual: 95-8662) Flange mount assembly for X3301 and X3302, allows the detector to be mounted externally to monitor storage or process areas. Not suitable for Zone 0 defined locations.

Flame Detector Mounting Hardware

Model	Part Number	For Use With	Ship Weight

*Note: Screws that connect collar halves enter from the top

**Note: Screws that connect collar halves enter from the bottom

Flame Detector Mounting Hardware

4-Inch Pipe Mount Bracket and U-Bolt Kit (Specification Sheet 90-1227) This kit is used to install an X-Series flame detector and Q9033 mounting arm to a 4-inch pipe. This kit includes a pipe mount plate, all hardware for installing mounting arm to plate, and U-Bolts and hardware for attaching the pipe mount plate to a 4-Inch pipe. All materials are 316 Stainless Steel.

4-Inch Pipe Mount Bracket and U-Bolt Kit

Model	Part Number	Ship Weight
4" Pipe Mnt Kit, SS, w/ Hardware	000609-026	2.5 lb (1.3 kg)

2-Inch U-Bolt Kit (Specification Sheet 90-1228) This kit is used to install an X-Series flame detector and Q9033 mounting arm to a 2-inch pipe. This kit includes two U-bolts, washers, lock washers, and hex nuts. All materials are 316 Stainless Steel

2-Inch Pipe Mount Bracket and U-Bolt Kit

Model	Part Number	Ship Weight
2" Pipe Mt. U Bolt Kit	000609-035	0.75 lb (0.3 kg)

Sun shade for X-Series Flame Detectors (Specification Sheet 90-1229)The sun shade installs between the wall, pole surface, or pole mount bracket and the Q9033 mounting arm providing the flame detector with protection from the sun and precipitation. Material is 316 Stainless Steel. Detector in photo below is shown installed on a 4-inch pole using the 4-Inch Pipe Mount Bracket and U-Bolt Kit (Part number 000609-026) which is not included with the Sun Shade.

Sun shade for X-Series Flame Detectors

Model	Part Number	Ship Weight
Stainless Steel Sun Shade for X-Series Flame Detector	000003-067	5 lbs. (2.27 kg)

ACCESSORIES

Power Supplies

EQP21XXPS Power Supplies can be used as singular or duplex. The power supply is available in a DIN rail mount or panel mount configuration for ease of mounting. Power supplies should be sized to approximately 50% of the power draw requirement or to local code requirements.

EQP21XX Power Supply

Model	Part Number	Description	Ship Weight
EQP2120PS-B	010988-001*	EQP2120PS-B 20A 120/220V PANEL	3.7 lb (1.7 kg)
EQP2120PS	010988-002	EQP2120PS 20A 120/220V DIN	3.7 lb (1.7 kg)

ACOUSTIC

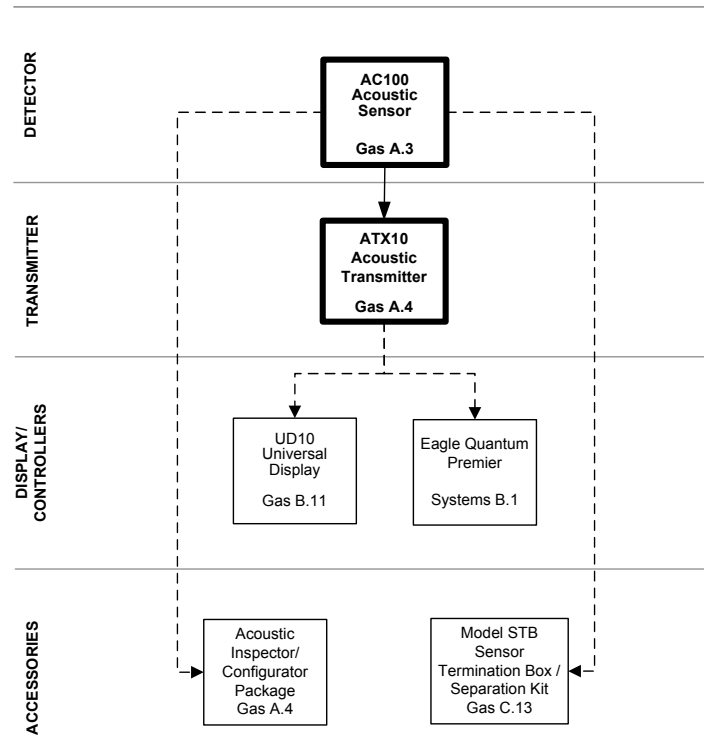

FlexSonic® Acoustic Detector

The **FlexSonic® Acoustic Detector** – comprised of the **AC100 Acoustic Sensor** and the **ATX10 Acoustic Transmitter** (Spec Sheet: 90-1208) is designed to recognize the unique frequency content of events such as gas leaks. When a pressurized gas leak occurs, the frequency content of the sound being generated extends beyond the audible portion of the spectrum into the ultrasonic region (above 20 kHz). The intensity of the sound generated by a leak is determined by several factors including pressure differential, leak rate, gas viscosity, and distance from the leak source.

Acoustic detection is less susceptible to environmental factors (such as high winds) that can degrade the ability of traditional sensing technology based on gas concentration to detect the presence of a leak. When combined with line of sight and/or point gas detectors, the additional layer of protection provided by the FlexSonic Acoustic Detector offers the ultimate solution for gas leak detection.

- Analyzes 24 discrete ultrasonic bands
- Nearly instantaneous response
- Non-contact gas leak detection
- 4-20 mA output combined with HART
- Can detect small gas leaks at or below 6 bar (87 psi)
- Extensive data logging with removable storage that records the acoustic spectrum
- Superior false alarm discrimination with patented technology
- **Ideally suited for locations where traditional technologies are challenged, such as outdoor and unmanned operations**
- Large detection coverage area
- FM, CSA, ATEX, and IECEx
- Certified SIL 2 Capable for all gas types
- Globally approved Explosion-proof 316 stainless steel housing
- Integrated Acoustic Integrity Check (AIC)
- No routine calibration required
- Not affected by poisoning

INFRARED

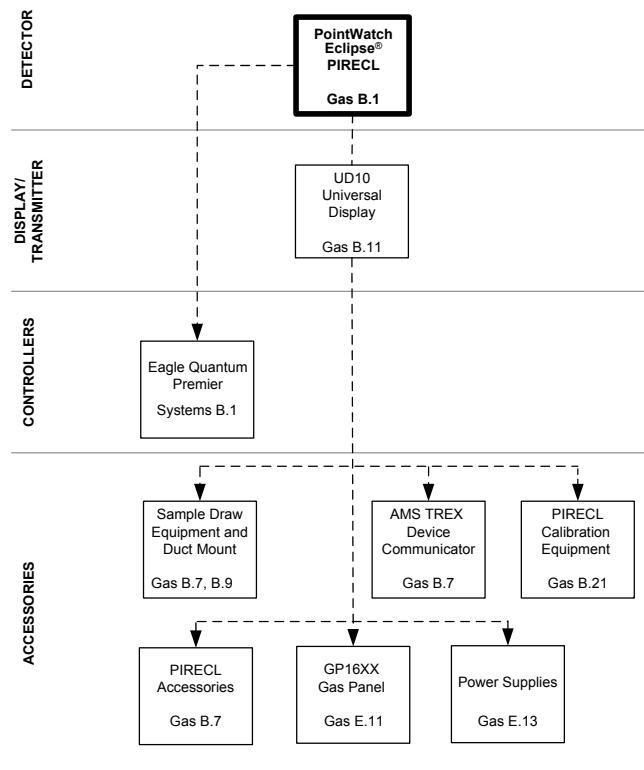

PointWatch Eclipse® PIRECL Infrared Hydrocarbon Gas Detector

#1 SELLING DET-TRONICS PRODUCT!

The **PointWatch Eclipse PIRECL Hydrocarbon Detector** (Spec Sheet: 90-1138) is our most rugged stainless steel, point infrared gas detector providing detection of methane, propane, butane and ethylene, among other flammable hydrocarbon gases in the LFL range. Standard signal outputs include isolated 4-20 mA, HART communication protocol, and RS-485 serial communication supporting Modbus. An Eagle Quantum Premier (EQP) version, and optional 2-alarm plus 1-fault relay package are also available. A tri-color LED provides visual display of operating status. The weather baffle provides excellent optics protection with an easy twist-lock removal. Additional features include:

- Compliance to ANSI/ISA-12.13.01-2000 performance standard
- Performance certified to ATEX EN60079-29-1, FM 6310/6320, and CSA 22.2 #152
- Eagle Quantum Premier model
- **Models available with SIL 2 certification**
- Internal wiring compartment saves money and time spent on installation
- Heated optics
- Non-intrusive calibration
- Immune to poisoning
- Handheld communicator capability
- FDT/DTM capable
- Ex d, e, ib protection designs
- FM, CSA, ATEX, and IECEx hazardous location certifications
- DNV and MED offshore certifications
- Conforms to global life safety requirements for combustible gas when connected through:
 - Internal relays, EQP Controller, FlexVu UD10, UD10-DCU, Infiniti U9500, EQ3710 Analog Input Module (AIM)
- Remote calibration capability using UD10 or model PIRTB junction box
- **Sample draw and duct mount accessories available**
- LON configurations are certified as NFPA 72 Class X devices
- Fast response output options available

PIRECL Accessories and Sample Draw

The **AMS TREX Device Communicator** is available from Det-Tronics. The intrinsically safe AMS TREX Communicator enable connection to the PIRECL via the onboard optional HART port connection. Features include a 5.7 inch (14.5 cm) resistive touchscreen display, loop power to power a device, and loop diagnostics.

The **Remote HART Port Kit and Remote HART cable kit** (Manual: 95-8553) are used with the Model PIRECL PointWatch Eclipse IR gas detector to provide access to the Eclipse's optional onboard, intrinsically-safe HART port for a distance up to 20 meters. Cable set is 20 meter long, 2-core, shielded 20 AWG conductors with overall PVC-jacket, and is IEC332 approved.

The standard factory-installed **Weather Baffle** (Spec Sheet: 90-1155) for the PIRECL Eclipse comes with a 3/16" (4.8 mm) barb fitted inlet tube. A special replacement weather baffle is available with a 1/16" FNPT, internally-threaded calibration gas opening. It enables users to install a threaded compression fitting (not supplied) into the baffle for use with plastic or metal tubing, and is 007529-XXX Direct Duct compatible.

The **Q300A Sample Draw Cup** (Manual: 95-8706) enables the Model PIRECL Eclipse to function within a gas sampling system. It consists of an outer cup assembly with stainless-steel, inlet/outlet compression fittings for 0.25 inch diameter tubing, a special inner baffle assembly with external-threaded extension, and silicon gaskets to ensure proper cup assembly seal is provided.

AMS TREX Device Communicator

Part Number	Description	Ship Weight
103922-003*	AMS TREX Device Communicator	7.5 lb (3.4 kg)

*Discount does not apply.

Remote HART Replicator Kits for use with PIRECL

Part Number	Description	Ship Weight
000118-010	Remote HART Port Kit, includes 20 meter prefab cable set	7.5 lb (3.4 kg)
000118-020*	Remote HART Cable Kit, includes 20 meter prefab cable set	7.5 lb (3.4 kg)

*Kit requires the use of a Communicator-to-Cable Connector (p/n 000118-021) for connection to the HART field communicator.

Spare Parts for HART Port Replicator Kit

Part Number	Description	Ship Weight
000118-011	Cordset, 20 meters intrinsically safe cable with prefab connectors	6 lb (2.7 kg)
000118-012	Stainless steel adapter for PIRECL HART connector	<1 lb (<0.45 kg)
000118-013	HART port connector box, IP67 rated, w/stainless connectors	<1 lb (<0.45 kg)
000118-016	SS Cap, Male	<1 lb (<0.45 kg)
000118-021*	Extension cordset, TREX Communicator to 000118-011	1 lb (0.45 kg)

*Qty 1 required per each TREX Communicator.

PIRECL Weather Baffles

Part Number	Description	Ship Weight
007165-002*	Weatherbaffle with std inlet nozzle, w/hydrophobic filter (standard)	<1 lb (<0.45 kg)
007165-005	Weatherbaffle w/ 7/16-20 ext threads	<1 lb (<0.45 kg)

*Inlet nozzle is removeable to provide a 1/16" FNPT inlet.

PIRECL Sample Draw Cup

Part Number	Description	Ship Weight
012200-001	Q300A Sample Draw Cup for PIRECL (not included), 1/4" fitting	8 oz (0.23 kg)

PIRECL Miscellaneous Parts

Part Number	Description	Ship Weight
006682-002	PIRECL windshield calibration bag	<1 lb (<0.45 kg)
009192-001	Cover, calibration nozzle, tethered, clear*	<1 lb (<0.45 kg)
102740-002	Calibration magnet†	<1 lb (<0.45 kg)
007145-101	Relay Board	<1 lb (<0.45 kg)
107427-040	O-ring, 3.75" I.D., j-box cover	<1 lb (<0.45 kg)
107427-052	O-ring, 2.43" I.D., weathershield	<1 lb (<0.45 kg)
107427-053	O-ring, 3.25" I.D., front flange (internal)	<1 lb (<0.45 kg)

*Replaces discontinued calibration cap p/n's 102823-001 and 103035-001

†Calibration magnet is provided on the order with a PIRECL

Duct-Mounting Kits for PointWatch Eclipse Model PIRECL

The **Direct Duct Mount Assembly** (p/n 007525-XXX series) (Spec Sheet: 90-1151) is FM approved for use with PointWatch Eclipse model PIRECL to be installed directly within air handling ductwork. The assembly is mounted on the duct wall, with the PIRECL sensing chamber exposed directly to duct airflow, ensuring fast response to Methane. A built-in calibration gas nozzle with an external, self-sealing fitting enables testing and calibration without removal of the detector from the duct. Not recommended for applications where duct air temperatures can exceed 167 °F (75 °C). Price includes all necessary hardware for proper operation, but does not include the PointWatch Eclipse PIRECL gas detector. A factory pre-assembled Direct Duct Mount Kit is available (p/n 007529-XXX series) that provides a PIRECL detector prefit into the Direct Duct Mount kit assembly. Pricing for the 007529-XXX assembly includes the PIRECL gas detector. The Direct Duct Mount Assembly complies to the ANSI/ISA-12.13.01-2000 performance standards.

Vertical Mount

Horizontal Mount

Direct Duct Mount Kits (PIRECL not included)

Duct-Mounting Kits for PointWatch Eclipse Model PIRECL

The **Model Q900 Duct Mount Kit** (Spec Sheet: 90-1152) is FM approved for use with PointWatch Eclipse model PIRECL to detect combustible hydrocarbon gases within air handling ductwork. The Q900 is mounted to the exterior (top or side) of the duct wall and utilizes a duct inlet / outlet tube arrangement that provides cross-duct air sampling without the need for vacuum pumps or aspirators. The Duct Mount Kit is ideal for high temperature applications, and high temperature flexible teflon tubes are provided to enable easy access to optics for inspection purposes. Price includes all necessary hardware for proper operation, but does not include the PIRECL gas detector. One duct air inlet tube and one outlet tube are furnished with each Q900 kit. The Q900 Duct Mount Kit complies to the ANSI/ISA-12.13.01-2000 performance standards.

NOTE: The Direct Duct Mount and Q900 Duct Mount Accessories are third-party performance approved by FM.

Model Q900 Duct Mount Kit (PIRECL not included)

Part Number	Description	Ship Weight
007355-001	Q900A1001 Duct Mount Kit, 316 SS (tubes included) specify length of inlet tube at time of order (1, 3, 6, 10, or 13 ft.)	7 lb (3.2 kg)
009931-001	Q900C1001 Duct Mount Kit for Marine applications, 316 SS (tubes included) specify length of inlet tube at time of order (1, 3, 6, 10, or 13 ft.)	27 lb (12.25 kg)
007355-901	Q900A1001-R Duct Mount Kit, 316 SS (tubes included) specify length of inlet tube at time of order (1, 3, 6, 10, or 13 ft.)	7 lb (3.2 kg)

FlexVu® UD10 Universal Display (for Infrared)

FlexVu UD10 Universal Display (Spec Sheet: 90-1200) is recommended for applications where a gas detector with digital read-out of detected gas levels are required. The FlexVu UD10 Universal Display Unit is designed for use with various Det-Tronics infrared gas sensor/transmitters such as PIRECL, PIR9400, PIRDUCT, or LS2000. The display unit is designed and approved as a stand-alone controller when connected to a certified gas detector and performs all the functions of a gas controller.

- Compliance to ANSI/ISA-12.13.01-2000 performance standard
- Performance certified to FM 6310/6320, CSA 22.2 #152, ATEX EN60079-29-1
- Division Approval Ratings: FM and CSA
- Zone Approval Ratings: FM, CSA, ATEX, and IECEx
- Eagle Quantum Premier model
- **Universal design supports a variety of Det-Tronics sensors/detectors**
- Non-intrusive menu allows device configuration and calibration without de-classifying the hazardous area
- **Continuously displays gas level, gas type, and units measured**
- Data logger for event time and date stamping
- Heated and backlit display
- Relay, modbus, and linear isolated/non-isolated 4-20 mA output with HART, **configurable 4-20 mA output loop monitoring**
- FDT/DTM capable
- IP66 rated

FlexVu® UD10 Universal Display Repair / Upgrade Kit

(Technical Bulletin: 76-1046) The UD10 Repair/Upgrade Kit allows field conversion of an existing U9500 Infnit® Transmitter, Model 505 Transmitter, or Eagle Quantum Premier® Digital Communication Unit (DCU) to a FlexVu® UD10 Universal Display. The existing junction box base, along with the existing conduit and field wiring, can be left in place and do not need to be replaced.

Model PIRTB PointWatch Termination Box

- Use for stand-alone PointWatch Model PIR9400
- Required for remote separation from U9500H transmitter
- Use with PIRECL Eclipse or PIR9400 when remote calibration initiation is required
- Magnetic reed switch calibration and LED gives calibration feedback
- Tall cover boxes with window enable one person, non-intrusive calibration
- Short cover boxes without window require two people to accomplish non-intrusive calibration

KEY: — = Required - - - - = Option —●— = Choice Required

PIRDUCT IR Gas Monitor

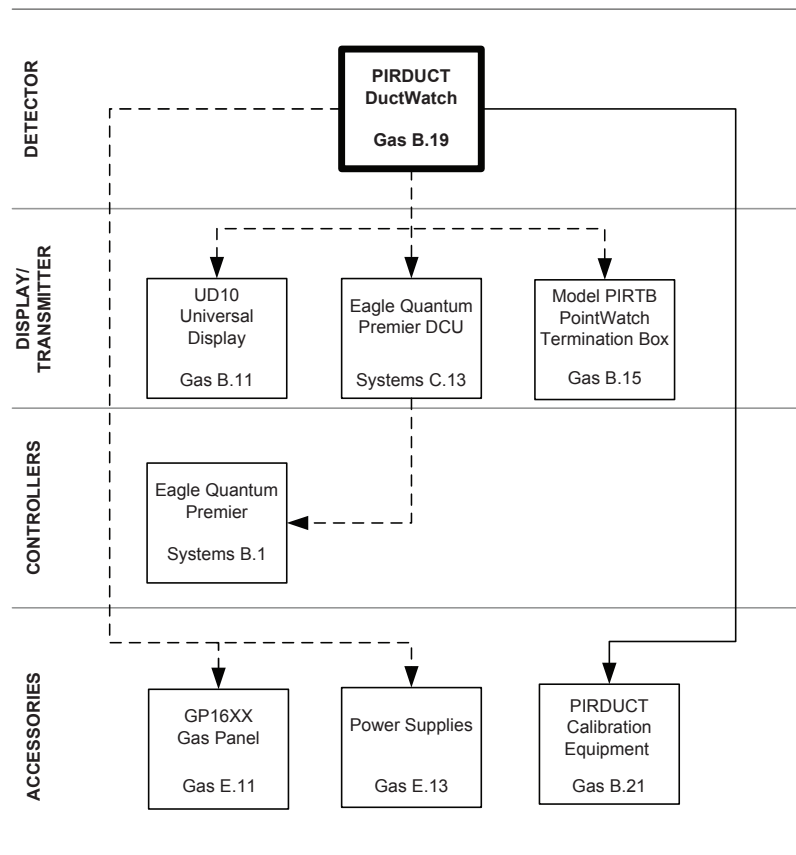

The Model **PIRDUCT** DuctWatch (Spec Sheet: 90-1188) is an infrared (IR) based flammable gas detection/monitoring solution ideal for combustion turbine enclosure detection/monitoring and sample air handling ductwork applications. The DuctWatch is easy to install and commission, and does not require expensive extractive sampling system hardware. Providing a full scale measurement range of 0 to 15% LFL (7500 ppm) methane vapor concentration, the DuctWatch delivers a new level of flammable hydrocarbon gas protection for high airflow environments. PIRDUCT is compatible for mounting on any flat mounting surface, and is provided with a solid mounting plate with seal gasket to prevent air leakage. Minimum internal duct width of 3 feet (1 meter) is required for proper instrument clearance and installation. Air movement is required for proper device performance.

- Compliance to ANSI/ISA-12.13.01-2000 performance standard
- Performance certified to ATEX EN60079-29-1, FM 6310/6320, and CSA 22.2.

PIRDUCT is available in the following configurations:

- Factory-fit with an aluminum 5-port Det-Tronics PIRTB wiring termination box
- Factory-fit with a Det-Tronics aluminum 2-port Eagle Quantum Premier DCU
- No junction box provided on type "5" models
- Fully compatible with FlexVu UD10 (sold separately), for display readout and calibration capabilities

PIRECL, PIR9400, and PIRDUCT Certified Calibration Kits

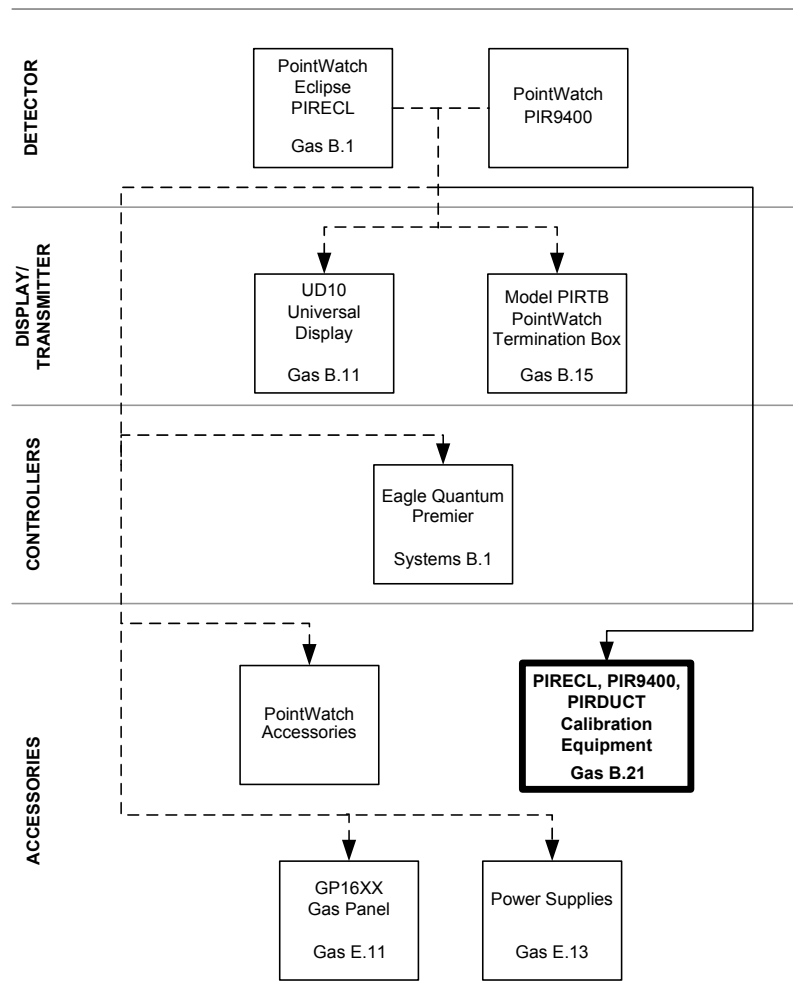

PIRECL, PIR9400, and PIRDUCT Certified Calibration Kits (Spec Sheet: 90-1214) are high accuracy compressed gas calibration kits provided for field calibration of all PointWatch IR detectors. Each kit includes:

- Two 3.6 ft³ (103 liters) cylinders of Class 2.2 non-flammable, non-toxic compressed gas
- A 2.5 liter/minute regulator and pressure indicator
- 3-foot tube
- Sturdy plastic carrying case

The Windshield Calibration Bag enables calibration to be performed in abnormally high wind conditions. The bag is slipped over the gas detector and secured with a Velcro sealing strap. Gas is applied to the detector through the calibration nozzle on the end of the detector.

NOTE: PointWatch PIR9400, and PointWatch Eclipse each require their own unique calibration bag model (not included in Calibration Kit).

FlexSight™ LS2000 Line-of-Sight Infrared Gas Detector

The **FlexSight LS2000 Line-of-Sight Infrared Gas Detection System** (Spec Sheet: 90-1215) is a stainless steel, IR beam-type hydrocarbon gas detection system. The system consists of two modules (transmitter and receiver) offering:

- Eagle Quantum Premier model
- **Industry Leading Misalignment Tolerance: ± 0.8 degrees (~ ± 56 cm @ 40m; $\sim \pm 168$ cm @ 120m). Patented design.**
- Compliance to ISA-12.13.04 performance standard
- Third party certified for Methane (default). Factory calibrated to Methane, Propane, and Butane
- Performance certified to EN60079-29-4
- -55°C to $+75^{\circ}\text{C}$ certified temperature range
- Compliance to FM6325 and ISA-12.13.04 performance standards
- **Certified SIL 2 capable**
- Module separation distance range from 5-120 meters
- IR source: High performance, long lasting xenon flashlamp - **10 year warranty on IR source**
- **5 year detector warranty**
- Standard 4-20 mA output (configurable), HART communications (on receiver), RS485 Modbus
- Optional alarm relays (Ex d only)
- **Easy Install / Alignment**
 - Mounting / alignment hardware included with both modules
 - Built-in locking adjusters deliver fine control of alignment angles
 - Telescope alignment tool for accurate alignment
 - **No HART or Software Interrogation tool needed**
- Use of **'Smart'** monitoring and control: maintains device temperature, heater obscuration triggers, drift / beam block tolerance, power supply and 4-20 mA monitoring, event logging, power consumption management
- Non-intrusive zero calibration options: on-board magnetic switch, HART communication, external switch, or MODBUS communication
- DNV Maritime approval
- Globally certified including SIL, FM, CSA, ATEX, IECEx, CE, DNV, INMETRO, and CUTR / KIM approvals
- Optional communication link provides: dynamic lamp power adjustments, synchronized LEDs, remote configuration read and calibration initiation from the transmitter

Ship Weight = 85 lbs (38 kg)

NOTE: All complete systems have a long range (L) of 30-120 meters or a short range (S) of 5-60 meters (apertures may be needed for shortest 15m of each range).

The complete system includes a transmitter, receiver, aperture, and mounting hardware.

LS2000 Accessories

Part Number	Description
012287-002	LS2000 Alignment Tool
012673-001	System Test Film, (set of 5 films)
103922-003	AMS Trex Device Communicator
014020-001	W6300G1006 Gas Inspector II Kit (PC software and connection hardware included)
009246-003	High Range LS2000 Gas Test Cell (0.125)
009246-001	Low Range OPECL Gas Test Cell
009246-002	High Range OPECL Gas Test Cell
009246-004	Gas Test Cell, LS2000 Methane IEC
009246-005	Gas Test Cell, LS2000 Propane ISO
009246-006	Gas Test Cell, LS2000 Propane IEC
009246-007	Gas Test Cell, LS2000 Butane ISO
009246-008	Gas Test Cell, LS2000 Butane IEC
012840-001	Gas Cell Adapter (converts OPECL Test Cell to mount on LS2000 Rx)
012718-003	Flat Surface Adapter Plate (converts OPECL flat surface mounting to LS2000)
012790-001	Thermal Shield for Right Module*
012791-001	Thermal Shield for Left Module*

* Two Thermal Shields required per complete LS2000 system (one right and one left)

**System Test Film
012673-001**

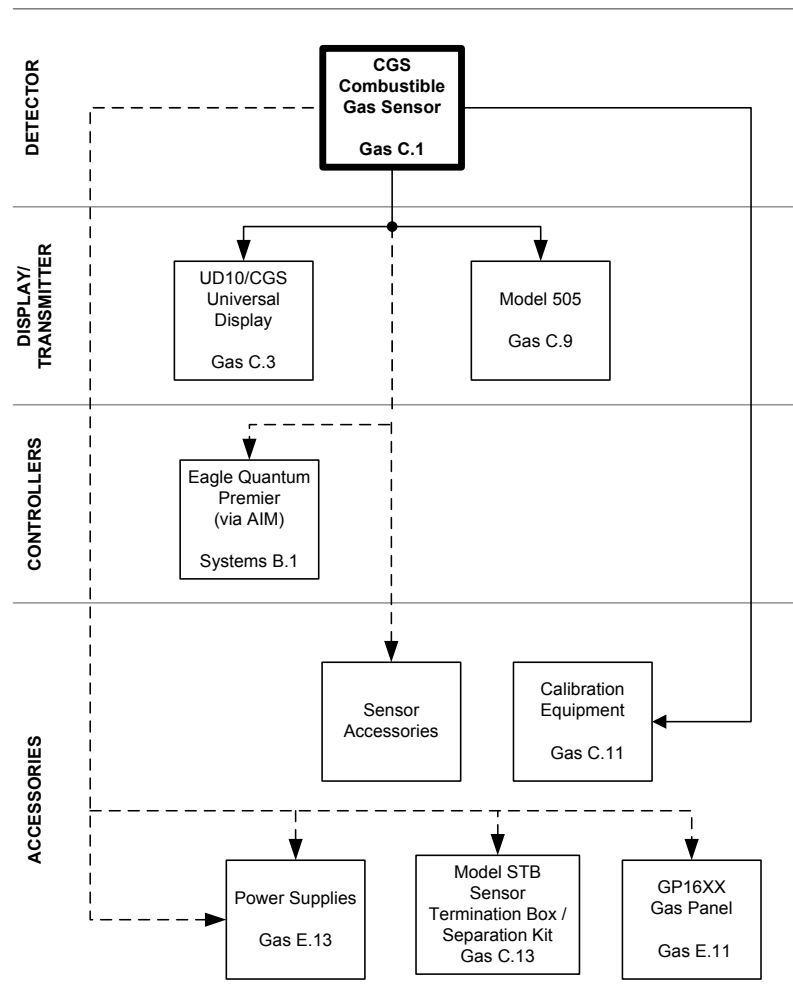

CATALYTIC

CGS Combustible Gas Sensor

CGS Combustible Gas Sensor (Spec Sheet: 90-1041). Stainless steel catalytic sensor that provides an accurate measurement of combustible gas concentration in the % LFL range. Requires FlexVu UD10, Model 505, U9500A or DCUJEX transmitter.

- Compliance to ANSI/ISA-12.13.01-2000 performance standard
- Performance certified to FM 6310/6320, CSA 22.2 #154, and ATEX EN60079-29-1
- Performance certified to IEC60079-29-1 when connected to the FlexVu UD10, UD10-DCU
- **Detects hydrogen and hydrocarbon gases**
- Constant current or constant voltage options available
- Poison resistant construction
- 3/4" NPT or 20 mm thread option
- Wire lead options of 6" or 30"
- Sensor Separation Termination Box (STB) option available
- Variety of special accessories available
- FlexVu UD10 universal display provides full digital readout, calibration and user interface
- **Performance approved from -40°C to 75°C for life safety applications**
- Hazardous Location approved from -55°C to 125°C for process control applications
- SIL2 certified when used with FlexVu UD10 Universal Display

KEY: — = Required - - - = Option —●— = Choice Required

Combustible Gas Sensor for Models 505, 500, and K-Series Transmitters

CATALYTIC

FlexVuUD10 Universal Display (for Catalytic)

FlexVu UD10 Universal Display (Spec Sheet: 90-1200) is recommended for applications where a gas detector with digital read-out of detected gas levels are required. The FlexVu UD10 Universal Display Unit is designed for use with various Det-Tronics catalytic gas sensor/transmitters such as Model 505 or CGS. The display unit is designed and approved as a stand-alone device and performs all the functions of a gas controller.

- Compliance to ANSI/ISA-12.13.01-2000 performance standard
- Performance certified to FM 6310/6320, CSA 22.2 #152, ATEX EN60079-29-1, and IEC60079-29-1
- **Certified as a stand-alone combustible gas controller/detector when used with the CGS sensor**
- Division Approval Ratings: FM and CSA
- Zone Approval Ratings: FM, CSA, ATEX, and IECEx
- Eagle Quantum Premier model
- Non-intrusive menu allows device configuration and calibration without de-classifying the hazardous area
- Continuously displays gas level, gas type, and units measured
- Data logger for event time and date stamping
- Heated and backlit LCD display
- Relay, modbus, and linear isolated/non-isolated 4-20 mA output with HART, **configurable 4-20 mA output loop monitoring**
- IP66 rated
- SIL2 certified when used with CGS combustible gas sensor

FlexVu UD10 Model Matrix - CGS

MODEL	DESCRIPTION
UD10	Universal Display Unit
	TYPE MATERIAL
	A Aluminum
	S Stainless Steel (316)
	TYPE THREAD TYPE
	5M 5 Port, Metric M25
	5N 5 Port, 3/4" NPT
	TYPE OUTPUTS
	25 Relay, 4-20mA, RS485, HART
	28 EQP / DCU Emulator
	TYPE APPROVALS
	B INMETRO (BRAZIL)
	R VNIIFTRI (RUSSIA)
	S SIL
	T SIL/FM/CSA/ATEX/IECEX
	W FM/CSA/ATEX/IECEX
	TYPE CLASSIFICATION (Div/Zone)
	2 Ex d (Flameproof)
	TYPE OPTIONAL CONDITIONING BOARD
	C CGS

Typical UD10/CGS Customer Proposal

Qty	Part Number	Description
1	006824-003	Catalytic Combustible Gas Sensor (CGS), M20, CC
1	010254-001	UD10A5M25W2C Universal Display, AL, M25
2	101197-005	Stop plug, M25, AL
1	102804-001	Reducer, M25 to M20, AL

Option

Qty	Part Number	Description
1	226365-119	STB1A2MW Sensor Separation Termination Box

Accessories

Qty	Part Number	Description
1	225130-001	Methane Gas Calibration Kit, 50% LFL methane
1	226166-001	Spare 103 L gas cylinder, 50% LFL methane

CATALYTIC

Model 505 Combustible Transmitter (includes junction box, sensor ordered separately)

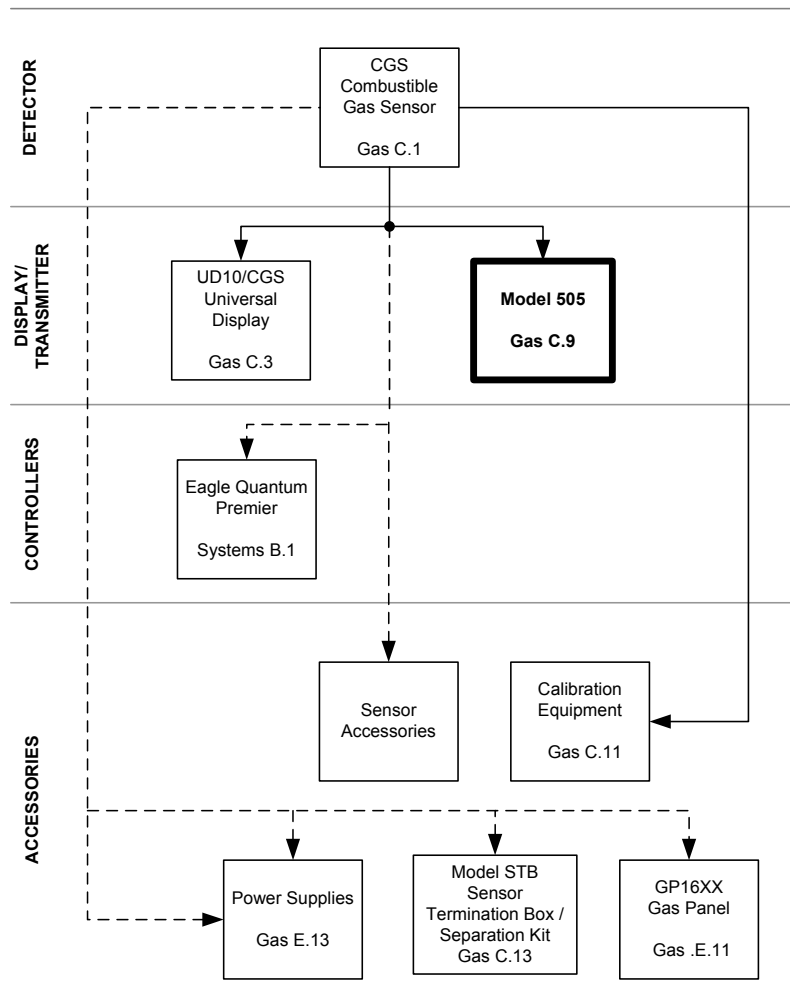

Model 505 Combustible Transmitter (Spec Sheet: 90-1114). Designed for use with CGS sensor, the 505 provides an analog signal output representing detected gas concentration. The 505 is always used with a gas controller.

- Compliance to ANSI/ISA-12.13.01-2000 performance standards when connected to a stand-alone gas controller
- Performance certified to ATEX EN60079-29-1
- 4-20 mA output
- Sensor sensitivity check function
- One person calibration
- Includes a variety of j-box options

Model 505 Retrofit Kits are available to upgrade an existing K-Series or Model 500 transmitter to the Model 505 transmitter using existing junction boxes and field wiring. The kit consists of:

- A transmitter board
- A label with calibration instructions for the junction box cover
- Instruction manual
- Junction box not included.

CGS Combustible Gas Certified Calibration Kits

Combustible Gas Certified Calibration Kits (Spec Sheet: 90-1059) for combustible gas sensors. Kits include sturdy plastic carrying case containing:

- Two 3.6 ft³ (103 liters) cylinders of Class 2.2 non-flammable, non-toxic compressed gas
- Regulator/shutoff valve with gauge, 3-foot tubing and stainless steel CGS calibration cup
- Regulator provides fixed flow rate of 1 liter per minute designed for CGS sensors
- 3-foot tube
- Sturdy plastic carrying case

Model STB Sensor Termination Box / Separation Kit

Model STB Sensor Termination Box / Separation Kit includes a junction box, proper connector board required hardware.

- Enables remote installation of sensor for optimum gas detection while offering easy calibration access to transmitter
- One sensor separation kit per sensor is required
- Optional remote calibration cups must be ordered separately (see CGS Accessories)
- Transmitter Sensor separation wiring terminal block (part number 102883-001) is sold separately
- Temperature approved models from -55°C to 125°C for process control applications

Duct Mount and Sample Draw Assemblies for CGS

Direct Duct Mount Assembly (Spec Sheet: 90-1046). For mounting combustible sensors to air handling duct work. The Direct Duct Mount CGS assembly enables combustible gas detection in air handling, heating, ventilating, and air conditioning ducts. Designed for flat surface mounting only.

- Seal gaskets provided to prevent leakage
- Circular duct wall cutout required
- Positive pressure ducts only
- Calibration gas inlet enables in-situ calibration
- Flexible conduit/cabling recommended to enable sensor removal from assembly

Model Q811 Duct Mount Enclosure (Manual: 95-8459) The Q811 provides combustible gas detection in air handling, heating, ventilating, and air conditioning ducts.

- Designed for flat surface mounting only
- Stainless steel NEMA 4X enclosure
- 316 Stainless steel enclosure and sample inlet tube spans the duct's cross section
- 1 foot outlet tube returns the sample
- Requires a 600–4000 fpm velocity

Sample Draw Cup Assembly for CGS. The Sample Draw cup assembly for CGS provides a sealed enclosure with compression fittings to enable the CGS to be used as part of an extractive gas sampling system.

- Aluminum enclosure with seals provides airtight flow chamber
- Brass compression fittings accept 1/4" OD tubing
- Threaded cover enables sensor removal
- Sampling system hardware required for proper operation

Sample Draw Cup Assembly for CGS

Part Number	Material	Ship Weight
009171-001	AL	1 lb (0.45 kg)

CGS Accessories: Rain Shields, Splash Guards, Dust Covers, Remote Calibration Cups

Rain Shields (Spec Sheet: 90-1046) protect combustible sensors from rain and snow.

Splash Guards (Spec Sheet: 90-1046) protect combustible sensors from ingress due to rain or splashing water.

Dust Covers (Spec Sheet: 90-1046) are recommended to protect sensors in windy, dusty, and oily environments. Porex and stainless steel filters available.

Remote Calibration cups provide the means to apply calibration to a CGS gas sensor from a remote location. Tubing not included. Options include barbed fitting or 1/4" compression fitting.

NOTE: Only one accessory recommended to be fitted per catalytic sensor.

Rain Shields

Part Number	Material	Ship Weight
226349-001	AL	6 oz (0.17 kg)

Splash Guard

Part Number	Material	Ship Weight
006491-001	AL	2 lb (0.95 kg)

Dust Covers

Part Number	Material	Ship Weight
225312-001	SS	2 oz (0.06 kg)
226190-001	Porex*	2 oz (0.06 kg)

*Porex not recommended for outdoors or temperatures above 75°C.

Remote Calibration Cups

Part Number	Use	Filter Material	Tube Fitting Type	Ship Weight
225777-001	Indoor	Porex*	Barbed	0.5 lb (0.14 kg)
004996-001	Indoor	Porex*	Compression	0.5 lb (0.14 kg)
006618-001	Outdoor	SS Screen	Barbed	0.5 lb (0.14 kg)
006618-002	Outdoor	SS Screen	Compression	0.5 lb (0.14 kg)

*Porex not recommended for outdoors or temperatures above 75°C.

TOXICS

GTS Toxic Gas Sensor Module (GT3000 Series)

GTS Toxic Gas Sensor Module (Spec Sheet: 90-1199) housings are incorporated into the GTX toxic gas transmitter. The electrochemical cell is embedded in the module.

- Performance approved models
- **NEW! Plus (+) series sensors with dual reservoir technology and extended temperature range**
- Sensor modules are available in a variety of gas types and concentration ranges
- Hot-swappable capabilities with the GTX transmitter
- Easy install and removal with the GTX transmitter
- Intrinsically safe (IS) design
- **SIL models available for Hydrogen Sulfide and Oxygen sensors**
- **DNV models available with Hydrogen Sulfide, Oxygen, and Carbon Monoxide sensors**
- Suitable for outdoor applications requiring IP66 rating
- Electrochemical sensor cell for increased accuracy, stability, and reliability
- Highly specific response reduces the chance of false alarms resulting from the presence of other gases
- Temperature compensated to ensure consistent performance over entire operating temperature range
- Hydrophobic filter easily replaced without opening the device or use of tools
- EMI/RFI hardened
- Event and calibration logs are stored in non-volatile memory and are accessible using a UD10/UD20, HART device, or AMS software.
- FDT/DTM capable
- Real-time clock with battery back-up

When should I use the plus (+) series sensors?

Det-Tronics recommends the plus (+) series for customers who:

- Need an extended temperature range (e.g. above +50C);
- Have experienced accelerated degradation of other electrochemical technologies due to high temp / high humidity or low temp / low humidity environments;
- Want to begin their transition to the latest electrochemical technology.

When should I use the traditional (non-plus) series sensors?

Det-Tronics recommends the traditional (non-plus) series sensors for customers who:

- Need an approval or gas type that is not yet available in the plus (+) series;
- Are satisfied with past sensor performance;
- Do not want to change part and model numbers on existing commitments.

Model Q912 Duct Mount Enclosure

The Model Q912 Duct Mount Enclosure provides reliable detection of toxic gases within air-handling ductwork. The device mounts directly to the ductwork, and uses a cross-sectional inlet and outlet sampling tube arrangement that allows large volume air sampling. The Q912 is compatible with the entire Det-Tronics GT3000 family of gas detectors, and is suitable for hazardous industrial and commercial applications.

- Stainless steel NEMA 4X enclosure
- Stainless steel sample inlet tube spans the duct's cross section
- 1, 3, 6, 10 or 13 ft (0.3, 0.9, 1.8, 3.1 or 4 meter) inlet tube options
- 1 ft (0.3 m) outlet tube returns the sample
- Requires a 600–4000 fpm velocity
- Designed for flat surface mounting only

Model Q912 Toxic Duct Mount Enclosure

TOXICS

GTX Toxic Gas Transmitter (GT3000 Series)

GTX Toxic Gas Transmitter (Spec Sheet: 90-1199). Stainless steel, toxic gas transmitter that provides an accurate measurement of toxic gasses.

- 316 Stainless Steel
- Approved as a stand-alone device when combined with a GTS toxic gas sensor
- 4-20 mA output with HART
- Intrinsically safe (IS) or explosion proof design
- IP66 rated
- **SIL 2 capable sensors are Hydrogen Sulfide and Oxygen**
- The FlexVu UD20 Display, when attached, is Interference-free
- Performance approved and verified
- Self-contained transmitter circuitry
- Event and calibration logs are stored in non-volatile memory and are accessible using a UD10/UD20, HART device, AMS software, or Gas Inspector.
- FDT/DTM capable
- Real-time clock with battery back-up
- Magnetic switch and LEDs for user interface
- 2-wire loop powered

Note: See GTD section for configuration options of factory pre-wired GTX Transmitter and FlexVu UD Display.

TOXICS

GT3000 Certified Calibration Kits

Configuration 1

GT3000 Certified Calibration Kits (Manual: 95-8643) consists of a sturdy carrying case containing:

Configuration 1

GT3000 calibration kit with two cylinders of calibration gas

- Two cylinders of Class 2.2 non-flammable, non-toxic compressed gas
- A 1 liter/minute regulator and pressure indicator
- 3-foot tube
- GT3000 Calibration Cup

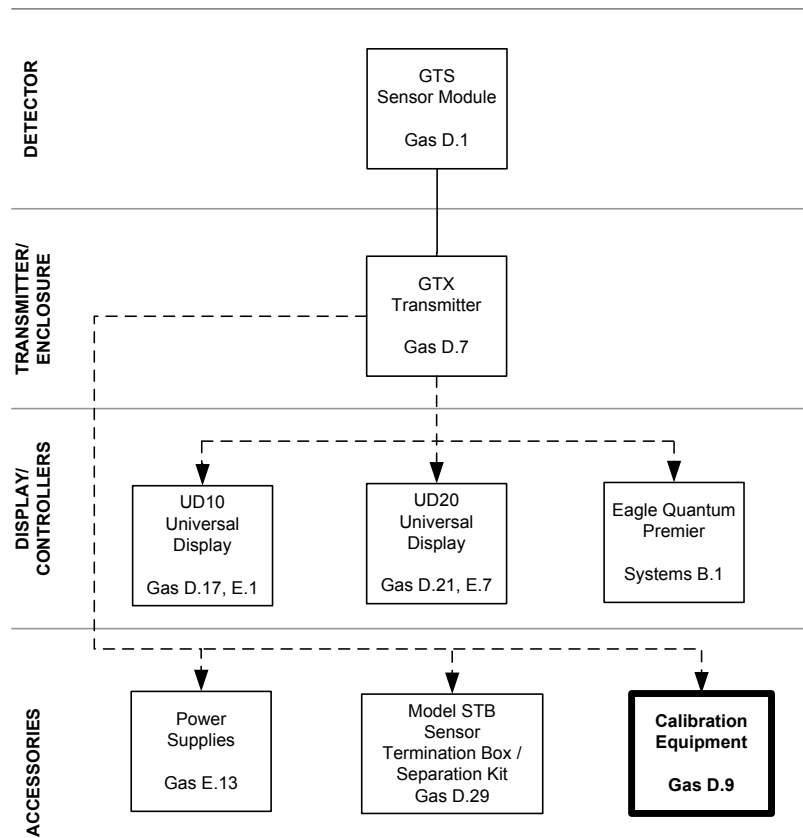

Configuration 2

GT3000 calibration kit with one cylinder of calibration gas and one humidifier

- One cylinder of Class 2.2 non-flammable, non-toxic compressed gas
- One humidifier
- A 1 liter/minute regulator and pressure indicator
- 3-foot tube
- GT3000 Calibration Cup

Configuration 2

Note: See GTD section for configuration options of factory pre-wired GTX Transmitter and FlexVu UD Display.

KEY: ————— = Required - - - - - = Option —●— = Choice Required

GT3000 Calibration Gas Kits

Part Number	Concentration	Gas	Balance	Cylinders	Humidifier	Ship Weight
010274-001	10 ppm	Hydrogen Sulfide	Nitrogen	2		11.5 lb (5.23 kg)
010274-002	25 ppm	Hydrogen Sulfide	Nitrogen	2		11.5 lb (5.23 kg)
010274-003*	50 ppm	Hydrogen Sulfide	Nitrogen	2		11.5 lb (5.23 kg)
010274-004	5 ppm	Chlorine	Nitrogen	2		11.5 lb (5.23 kg)
010274-005	50 ppm	Ammonia	Nitrogen	2		11.5 lb (5.23 kg)
010274-006	250 ppm	Ammonia	Nitrogen	2		11.5 lb (5.23 kg)
010274-008	500 ppm	Hydrogen	Air	2		11.5 lb (5.23 kg)
010274-009	20.90%	Oxygen	Nitrogen	2		11.5 lb (5.23 kg)
010274-010	50 ppm	Carbon Monoxide	Air	2		11.5 lb (5.23 kg)
010274-011	250 ppm	Carbon Monoxide	Air	2		11.5 lb (5.23 kg)
010274-013	10 ppm	Sulfur Dioxide	Nitrogen	2		11.5 lb (5.23 kg)
010274-014	50 ppm	Sulfur Dioxide	Nitrogen	2		11.5 lb (5.23 kg)
010274-016	10 ppm	Nitrogen Dioxide	Air	2		11.5 lb (5.23 kg)
014059-001	5 ppm	Chlorine	Nitrogen	1	1	11.5 lb (5.23 kg)

*Do not use for NTMOS.

NOTE: Average lead time is 2-3 weeks.

GT3000 Calibration Gas Kit Replacement Cylinders

Part Number	Concentration	Gas	Balance	Ship Weight
227117-011	10 ppm	Hydrogen Sulfide	Nitrogen	1.5 lb (0.7 kg)
227117-012	25 ppm	Hydrogen Sulfide	Nitrogen	1.5 lb (0.7 kg)
227117-001*	50 ppm	Hydrogen Sulfide	Nitrogen	1.5 lb (0.7 kg)
227117-006	5 ppm	Chlorine	Nitrogen	1.5 lb (0.7 kg)
227117-013	50 ppm	Ammonia	Nitrogen	1.5 lb (0.7 kg)
227117-019	250 ppm	Ammonia	Nitrogen	1.5 lb (0.7 kg)
227117-018	500 ppm	Hydrogen	Air	1.5 lb (0.7 kg)
226166-006	20.90%	Oxygen	Nitrogen	1.5 lb (0.7 kg)
227117-003	50 ppm	Carbon Monoxide	Air	1.5 lb (0.7 kg)
227117-004	250 ppm	Carbon Monoxide	Air	1.5 lb (0.7 kg)
227117-016	10 ppm	Sulfur Dioxide	Nitrogen	1.5 lb (0.7 kg)
227117-008	50 ppm	Sulfur Dioxide	Nitrogen	1.5 lb (0.7 kg)
227117-010	10 ppm	Nitrogen Dioxide	Air	1.5 lb (0.7 kg)

*Do not use for NTMOS.

NOTE: Average lead time is 2-3 weeks.

GT3000 Calibration Kit Replacement Parts

Part Number	Description	Ship Weight
009700-001	Magnetic Tool	<1 lb (0.45 kg)
009737-001	GT3000 Calibration Cup	8 oz (0.23 kg)
107427-059	O-ring for Calibration Cup	<1 lb (0.45 kg)
010780-003	GT3000 Remote Calibration Adaptor	<1 lb (0.45 kg)
101678-007	Tubing, 3 ft.	8 oz (0.23 kg)
101678-013	Tubing, 100 ft. spool	8 oz (0.23 kg)
162552-001	Regulator, 1 LPM	8 oz (0.23 kg)
162553-001	Carrying Case	8 oz (0.23 kg)

TOXICS

C7064E Sensor/Transmitter

C7064E Sensor/Transmitter (Spec Sheet: 90-1079) housing. Two-wire, stainless steel or aluminum toxic gas detector with 3/4" NPT or 20 mm threads. Purchase EC cell separately for monitoring H₂S toxic gases.

- 4-20 mA output is proportional to EC cell measurement range
- Electrochemical cell sold separately
- For use with:
 - FlexVu UD10 Universal Display
 - U9500 Infiniti Transmitter
 - STB Sensor Termination Box
 - DCU Digital Communication Unit
 - R8471X Toxic Controller
- Optional measurement ranges available for H₂S versions
- Hydrophobic filter provided on C7064E housings
- -40°C to 75°C hazardous location temperature rating

C7064E H₂S Electrochemical Sensor Housings (sensor sold separately)

Model	Part Number	Toxic Gas	Enclosure Threads	Enclosure Material	Measurement Range	Approvals	Other
C7064E4012	004539-009	Hydrogen Sulfide	3/4 NPT	SS	All	FM/CSA	Groups C, D
C7064E5012	004539-102	Hydrogen Sulfide	M20	SS	All	FM/CSA	Groups C, D
C7064E6031	004539-103	Hydrogen Sulfide	M20	SS	All	CSA	Groups C, D
C7064E5014	004539-105	Hydrogen Sulfide	3/4 NPT	SS	All	FM/CSA	Groups B, C, D

Note: All C7064E housings above require an electrochemical sensor cell (not included) for proper operation.

Shipping weight of all C7064E gas detector housings is 2.5 lbs (1.28 kg)

Electrochemical Sensor Cells for use with Model C7064E housings

Electrochemical sensor cells are provided for use with the C7064E (Spec Sheet: 90-1079) gas detector housings.

All sensors are shipped in a sealed bag. Store in a cool, dry place until installation/commissioning is required.

H₂S Electrochemical Sensor Cell

Part Number	Toxic Gas	Measurement Range (PPM)
005434-003*	Hydrogen Sulfide	0-20
005434-004*	Hydrogen Sulfide	0-50
005434-002	Hydrogen Sulfide	0-100

*Recommended for use with C7064E housings installed with U9500B Infiniti Transmitter only.

Shipping weight for sensor cells is 2 oz. (.1 kg)

C7064E Calibration Gas Kits

C7064E Calibration Gas Kits

Part Number	Concentration	Gas	Balance	Ship Weight
227115-001	50 ppm	Hydrogen Sulfide	Nitrogen	11.5 lb (5.23 kg)
227115-002	20 ppm	Hydrogen Sulfide	Nitrogen	11.5 lb (5.23 kg)
227115-014	10 ppm	Hydrogen Sulfide	Nitrogen	11.5 lb (5.23 kg)
227115-015	25 ppm	Hydrogen Sulfide	Nitrogen	11.5 lb (5.23 kg)
227115-008	Empty kit - no cal gas			8.5 lb (3.9 kg)

C7064E Calibration Gas Kit Replacement Cylinders

Part Number	Concentration	Gas	Balance	Ship Weight
227117-001	50 ppm	Hydrogen Sulfide	Nitrogen	1.5 lb (0.7 kg)

TOXICS

PointWatch Eclipse® PIRECL Infrared Carbon Dioxide (CO₂) Gas Detector

The **PointWatch Eclipse PIRECL Carbon Dioxide Detector** (Spec Sheet: 90-1207) is our rugged stainless steel, point infrared gas detector providing detection of carbon dioxide. Standard signal outputs include isolated 4-20 mA output, HART communication protocol, and RS-485 serial communication supporting Modbus. An optional 2-alarm and 1-fault relay package is available. A tri-color LED provides visual display of operating status. The weather baffle provides excellent optics protection with an easy twist-lock removal. Additional features include:

- Internal wiring compartment saves money and time
- Heated optics
- Non-intrusive calibration
- Handheld communicator capability
- Ex d, e, ib protection designs
- CSA, ATEX, CE, IECEx hazardous location certifications
- DNV type approval - maritime/offshore
- Remote calibration capability using PIRTB
- 0-2%/volume (0-20000) full scale range

FlexVu® UD10 Universal Display (for Toxics)

FlexVu UD10 Universal Display (Spec Sheet: 90-1200) is recommended for applications where a gas detector with digital read-out of detected gas levels are required. The FlexVu UD10 Universal Display Unit is designed for use with various Det-Tronics toxic gas sensor/transmitters such as GT3000, NTMOS or C706x. The display unit is designed and approved as a stand-alone controller and performs all the functions of a gas controller.

- Compliance to ISA-92.0.01 Part 1 performance standard, and EN50104 for oxygen depletion
- Division Approval Ratings: FM and CSA
- Zone Approval Ratings: FM, CSA, ATEX, and IECEx
- DNV type approval - maritime/offshore
- Eagle Quantum Premier model
- Universal design supports a variety of Det-Tronics sensors/detectors
- Non-intrusive menu allows device configuration and calibration without de-classifying the hazardous area
- **Continuously displays gas level, gas type, and units measured**
- Data logger for event time and date stamping
- Heated backlit display
- Relay, modbus, and linear isolated/non-isolated 4-20 mA output with HART, **configurable 4-20 mA output loop monitoring**
- IP66 rated

FlexVu® UD10 Universal Display Repair / Upgrade Kit

(Technical Bulletin: 76-1046) The UD10 Repair/Upgrade Kit allows field conversion of an existing U9500 Infronti® Transmitter, Model 505 Transmitter, or Eagle Quantum Premier® Digital Communication Unit (DCU) to a FlexVu® UD10 Universal Display. The existing junction box base, along with the existing conduit and field wiring, can be left in place and do not need to be replaced.

FlexVu® UD20 Universal Display

FlexVu UD20 Universal Display (Spec Sheet: 90-1201 - Explosion Proof Model, 90-1205 - Intrinsically Safe Model) supports the GT3000 Series toxic gas detectors.

- Compliance to ANSI/ISA-60079-11 and ISA-92.0.01 Part 1 performance standard
- Division Approval Ratings: FM and CSA
- Zone Approval Ratings: FM, CSA, ATEX, and IECEx
- LCD display
- Non-intrusive automatic calibration
- Non-intrusive menu system
- Linear 4-20 mA output with HART
- Explosion proof design
- IP66 rated
- **2 wire loop powered**
- **Certified Non-Interfering with GT3000 SIL model**

Note: See GTD section for configuration options of factory pre-wired GTX Transmitter and FlexVu UD Display.

TOXICS

GTD Toxic Gas Detector Assembly (GT3000 Series Toxic Gas Transmitter with FlexVu Universal Display or Separation J-Box)

GTD Toxic Gas Detector Assembly incorporates a GT3000 series toxic transmitter (GTX) with a FlexVu universal display (UD) or junction box (STB). The GTS toxic gas sensor module is sold separately.

- Non-intrusive automatic calibration
- Non-intrusive menu system
- Linear 4-20 mA output with HART, configurable 4-20 mA output loop monitoring
- **Permits easy installation for heavy or light toxic gas with the STB pre-connection**
- Explosion proof design
- Optional relay and RS485 package
- IP66 rated

Note: See GTD section for configuration options of factory pre-wired GTX Transmitter and FlexVu UD Display.

Model STB Sensor Termination Box and Separation Kit

Model STB Series Sensor Termination Box / Separation Kit (Manual: 95-8655) includes a junction box, proper connector board, required hardware to enable proper mounting, and wiring of models GT3000, NTMOS, and C706x series detectors, or any 4-20 mA device.

- Enables remote installation of sensor for optimum gas detection while offering easy calibration access to FlexVu UD10, GDTB (NTMOS), or U9500 Infronti
- One Sensor Termination Box per sensor is required

KEY: — = Required - - - - = Option —●— = Choice Required

†If two numbers are listed, the first number is for detector entry and the second number is for field cabling

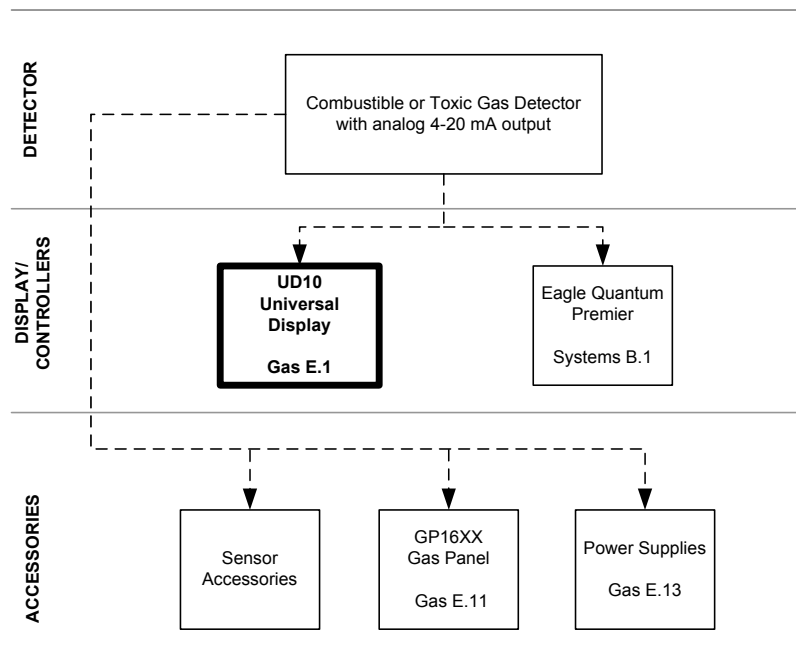

DISPLAYS AND CONTROLLERS

FlexVu® UD10 Universal Display

FlexVu UD10 Universal Display (Spec Sheet: 90-1200) is recommended for applications that require a gas detector with digital read-out of detected gas levels. The FlexVu UD10 Universal Display Unit is designed for use with various Det-Tronics gas sensor/transmitters. The display unit is designed and approved as a stand-alone device and performs all the functions of a gas controller.

- Compliance to ANSI/ISA-12.13.01-2000 performance standard
- Compliance to ISA-92.0.01 Part 1 performance standard, and EN50104 for oxygen depletion
- Performance certified to FM 6310/6320, CSA 22.2 #152, ATEX EN60079-29-1, and IEC60079-29-1
- **Approved as a stand-alone combustible gas and low concentration toxic controller, when using the relay contacts**
- Division Approval Ratings: FM and CSA
- Zone Approval Ratings: FM, CSA, ATEX, and IECEx
- Eagle Quantum Premier model
- Universal design supports a variety of Det-Tronics sensors/detectors
- Non-intrusive menu allows device configuration and calibration without de-classifying the hazardous area
- Continuously displays gas level, gas type, and units measured
- Data logger for event time and date stamping
- Heated and backlit display
- Relay, modbus, and linear isolated/non-isolated 4-20 mA output with HART, **configurable 4-20 mA output loop monitoring**
- IP66 rated

FlexVu® UD10 Universal Display Repair / Upgrade Kit

(Technical Bulletin: 76-1046) The UD10 Repair/Upgrade Kit allows field conversion of an existing U9500 Ininiti® Transmitter, Model 505 Transmitter, or Eagle Quantum Premier® Digital Communication Unit (DCU) to a FlexVu® UD10 Universal Display. The existing junction box base, along with the existing conduit and field wiring, can be left in place and do not need to be replaced.

FlexVu® UD20 Universal Display

FlexVu UD20 Universal Display (Spec Sheet: 90-1201 - Explosion Proof Model, 90-1205 - Intrinsically Safe Model) supports the GT3000 Series toxic gas detectors, and the PIRECL series combustible gas detectors.

- Compliance to ANSI/ISA-60079-11 and ISA-92.0.01 Part 1 performance standard
- Division Approval Ratings: FM and CSA
- Zone Approval Ratings: FM, CSA, ATEX, and IECEx
- LCD display
- Non-intrusive automatic calibration
- Non-intrusive menu system
- Linear 4-20 mA output with HART
- Explosion proof design
- IP66 rated
- **2 wire loop powered**
- **Certified Non-Interfering with GT3000 SIL model and PIRECL SIL models**

Note: See GTD section for configuration options of factory pre-wired GTX Transmitter and FlexVu UD Display.

Model GP16XX Gas Panel

Model GP16XX Gas Panel (Spec Sheet: 90-1210) is an economical system package, designed for selected gas detection applications.

- EQP Controller and components approved to ANSI/ISA12 and 92, FM 3610-6, CSA 22.2, EN60079-29-1.
- Utilizes Eagle Quantum Premier® (EQP)
- 16 gas detection points available
- Flexible device communication protocol (LON and/or 4-20 mA)
- User friendly HMI touch screen
- User configurable
- User defined alarm set-points
- Sounder on panel
- 24.0 in (60.96 mm) x 24.0 in (60.96 mm) x 6.4 in (16.2 mm)
- Two Low Alarm / Two High Alarm relays offered via the EQP controller

Model GP16XX Gas Panel

Model†	# AIM Modules	Ship Weight
GP1600	0	26.5 lb (12.0 kg)
GP1610	1	27.5 lb (12.5 kg)
GP1620	2	28.5 lb (13.0 kg)

*Discount does not apply

†Field devices not included

MODEL GP16XX INCLUDES

Below is a list of system components that are included or optional in the Model GP16XX Gas Panel system:

- EQP Controller – Supports up to 16 points of gas (included)
- EQ3710 AIM – Analog Input Module (optional, up to qty 2)
- EQ2220 GFM – Ground Fault Monitor (included)
- Power Supply – 24 Vdc, 10A (included)

EQP SYSTEM COMPONENTS

Below is a list of field devices compatible with the Model GP16XX Gas Panel system:

- PIRECL – PointWatch Eclipse
- UD10-DCU – FlexVu Universal Display
- Any 4-20 mA Device (via Analog Input Module)

OVERVIEW

Eagle Quantum Premier® System

The Eagle Quantum Premier System (Spec Sheet 90-1150) combines “fire detection and extinguishing agent release” and “hazardous gas monitoring” in one complete package. The system is intended for use in hazardous locations and is designed to meet the requirements of approval agencies from around the world. The system is Factory Mutual approved to 6310/6320 and compliant to ANSI/ISA 12.13.1 and CSA 22.2 #154. It is also ATEX certified to EN60079-29-1, IEC 60079-29-1 for combustible gas.

The system consists of a controller and a number of addressable microprocessor-based field devices. The controller coordinates system device configuration, monitoring, annunciation, and control, while the field devices communicate their status and alarm conditions to the controller.

The controller communicates with the field devices through a digital communications link referred to as the LON communications loop. As the name infers, the network topology is laid out as a loop that begins and ends at the controller. All of the field devices are connected into the communication loop. The communication loop is a specialized design to meet the requirements of a Signaling Line Circuit (SLC).

The LON communication loop offers several key advantages:

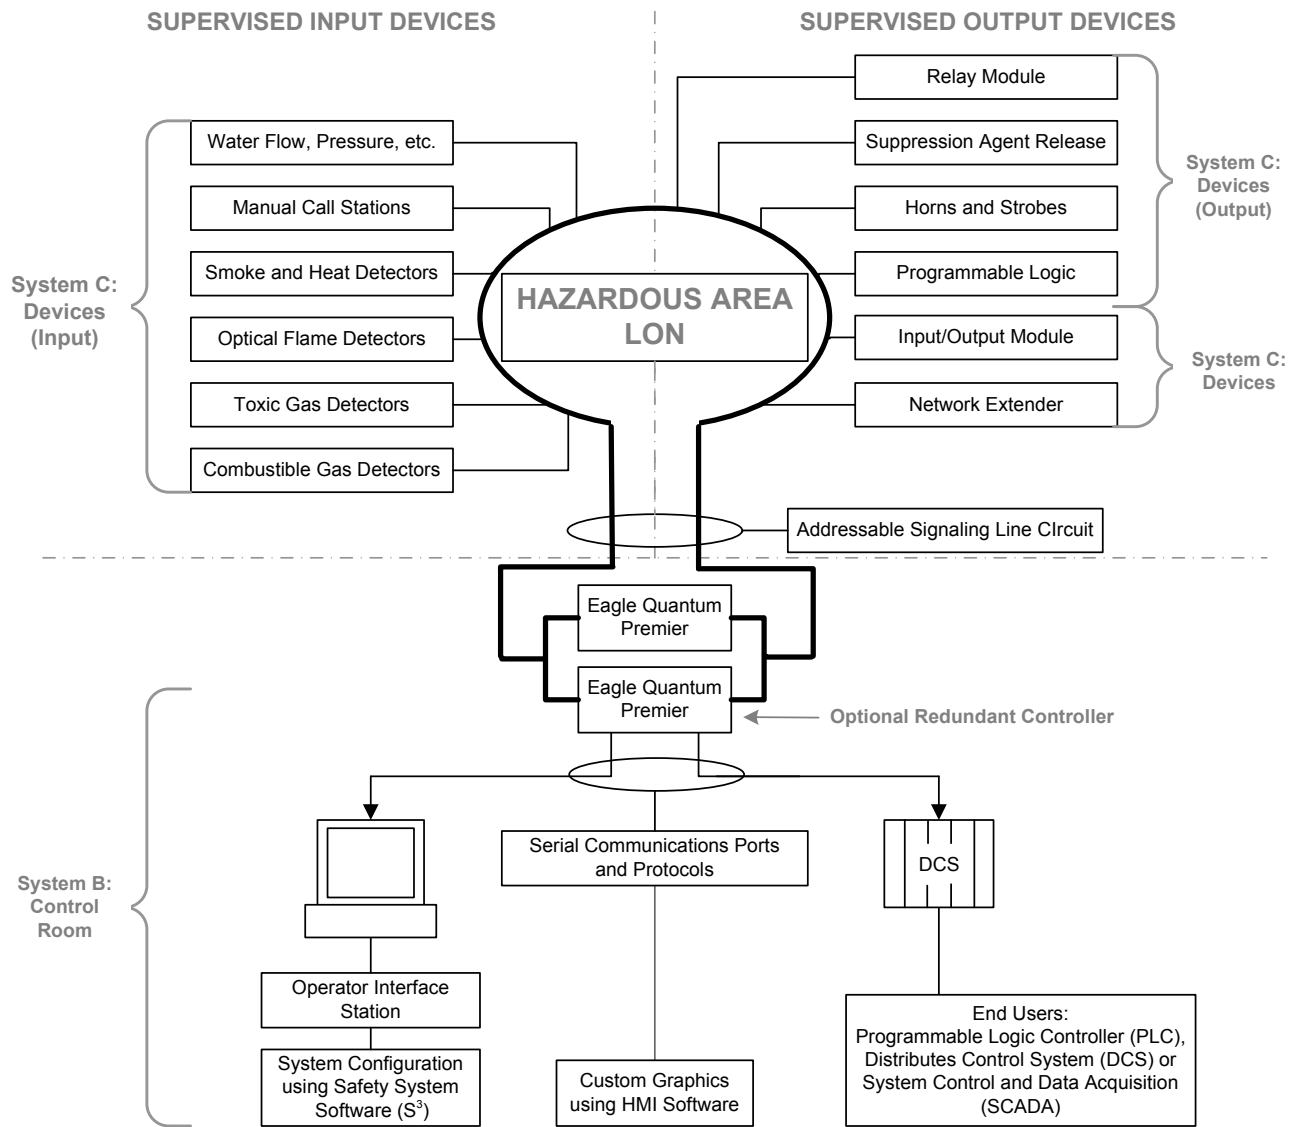

- SIL 2 certified communication protocol
- ANSI/NFPA Class X performance of SLC
- Peer-to-peer communications
- Expandability

The controller continuously executes the user logic programs that are programmed into the controller. The user logic programs are set up in the same fashion as IEC 61131-3 programmable logic programmed into programmable logic controllers (PLCs). Function block diagram logic gates are tied together with inputs, outputs, and other logic gates to perform a specific task. A number of tasks can be tied together to perform a system function.

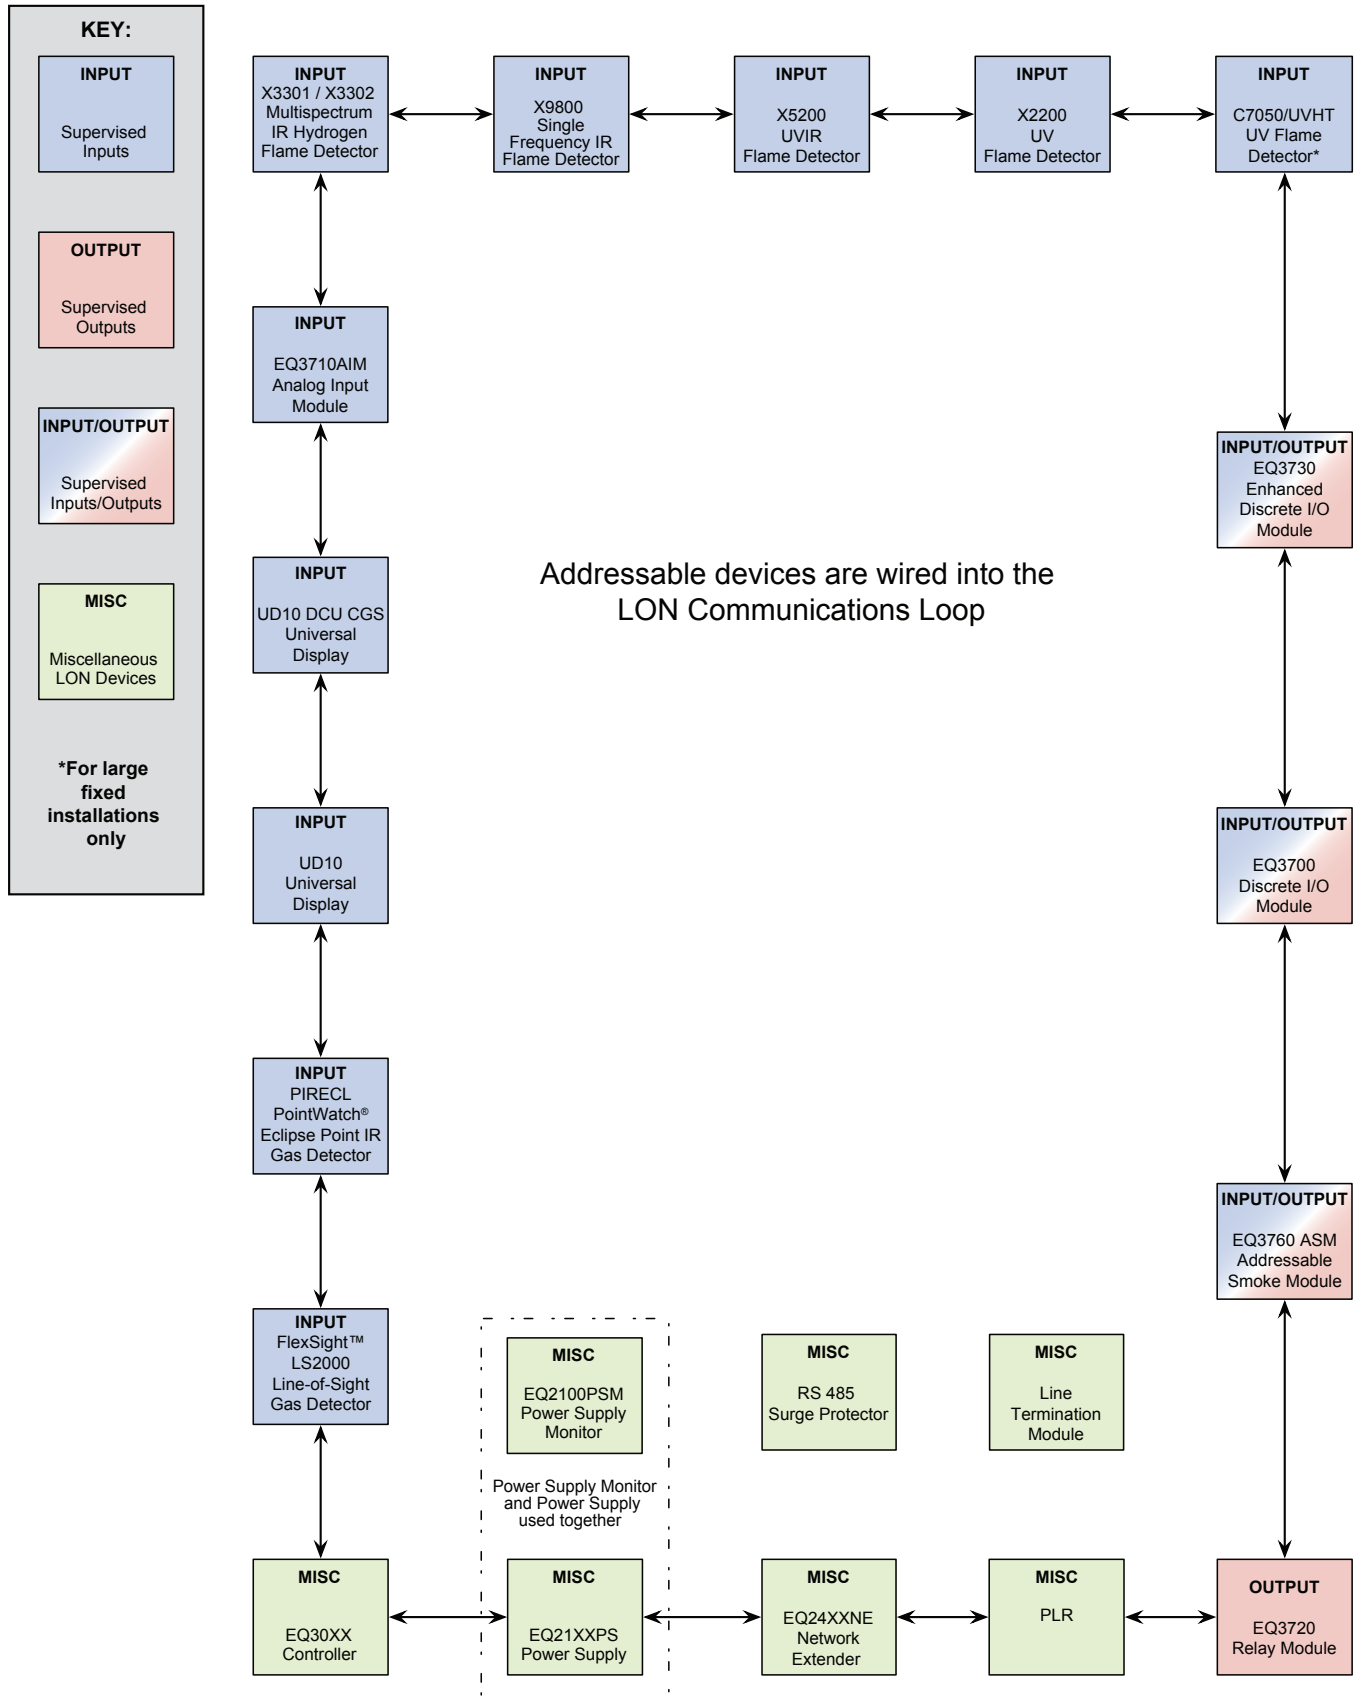

Typical programmed functions include flame/gas voting, timing delays, timing executions, latching conditions, alarm and trouble notification, suppression control, condition control, and process shutdown notification.

For complete system integration, the controller has the capability to communicate with other systems such as PLCs, distributed control systems (DCSs), and Supervisory Control and Data Acquisition (SCADA). Different communication protocols are supported, allowing the controller to communicate with other systems either directly or through communication gateways. The System Safety Software (S³) package supports an OPC server option that can publish system information to OPC clients.

- Simplex and redundant operation
- Class 1 Div. 2 locations combined with Zone 2 rated devices Type N
- Deluge and pre-action release capability for fire suppression
- Agent release capability for fire suppression
- Supports up to 246 addressable field devices
- Fault-tolerant controller with redundancy setting
- Up to 32,800 feet (10,000 meters) of LON network communication wire
- Eagle Quantum Premier LON version for a variety of Det-Tronics flame and gas detectors
- Support for integrating third-party detectors (4-20 mA, “dry contact” type outputs or two wire smoke detectors) into EQP system
- Field devices have nonvolatile memory for alarm and calibration logging
- System and field device built-in system diagnostics
- IEC 61131-3 programmable logic
- Up to four Modbus RTU communication ports available
- ControlNet optional communication card (supports redundant communication channels)
- Compliance to FM 3010-2014, ANSI/NFPA 72 2010, NFPA 72 2013 and NFPA 33
- Certified SIL 2 capable version available
- US Coast Guard type approval.

OVERVIEW

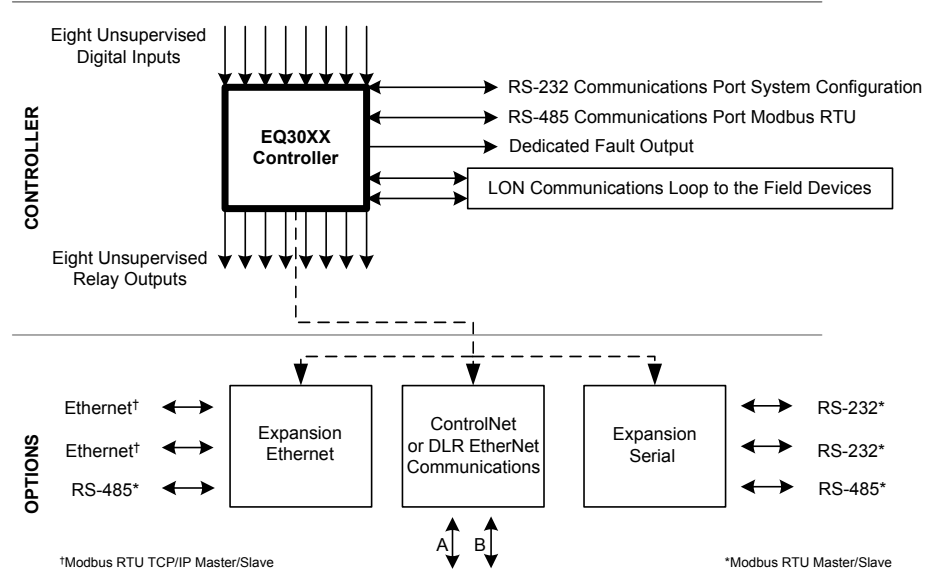

CONTROL ROOM

Eagle Quantum Premier Controller • EQ30XX

Eagle Quantum Premier Controller EQ30XX (Spec Sheet: 90-1148) The Eagle Quantum Premier Controller is a microprocessor-based module that performs all the communication and control functions for the system. The controller can be configured in a simplex or redundant mode of operation. It includes all the required operator interface controls for a fire alarm and releasing system.

- Fire detection and alarm
- Fire suppression control
- Gas detection and alarm
- Compliance to ANSI/ISA-12.13.01-2000 performance standard
- Performance certified to FM 6310/6320
- Performance certified to ATEX/IEC 60079-29-1
- Simplex or redundant operation
- Models with SIL 2 certification
- Programmable logic
- Optional Dual Ethernet Ports (Modbus TCP/IP)
- Multiple serial ports (three RS-232 and two RS-485)
- Transformer isolation of network ports
- Utilizes Modbus RTU, Modbus TCP/IP, or Allen Bradley protocols
- ControlNet Interface (Optional DLR Device level ring EtherNet DLR)
- Eight Programmable Relay Outputs
- Dedicated Fault Output
- Eight Digital Inputs
- Four-line, 20-character alphanumeric display
- LED status indicators
- Fault-tolerant communication loop
- Extensive built-in diagnostics
- Real-time clock
- Compact design
- US Coast Guard type approval.
- Lloyd's Register Type Approval.

CONTROL ROOM

Power Supplies

EQP21XXPS Power Supplies are used in pairs where the primary source of input supply is connected to one and the secondary source is connected to the other. A maximum of eight power supplies operated in parallel can be connected to each input supply. Both the primary and secondary sets must be individually capable of operating the system without the other supply. The secondary source is required to be continuously powered.

EQP21XX Power Supply

Model	Part Number	Description	Ship Weight
EQP2120PS-B	010988-001*	EQP2120PS-B 20A 120/220V PANEL	3.7 lb (1.7 kg)
EQP2120PS	010988-002	EQP2120PS 20A 120/220V DIN	3.7 lb (1.7 kg)

*For FM/USCG approved system

NOTE: Requires a minimum of two supplies & one diode module per system. Also requires a GFM (below).

EQP2410 Converter serves as a DC voltage regulator for the secondary/back-up power supply source. It converts grounded DC input source into floating DC output power for ground fault monitoring capability.

EQP2410 Converter

Model	Part Number	Description	Ship Weight
EQP2410PS-P	010892-001*	10A 24VDC CONVERTER, PANEL	2.7 lb (1.2 kg)
EQP2410PS	010892-002	10A 24VDC CONVERTER, DIN	2.7 lb (1.2 kg)

*For FM/USCG approved system

NOTE: Converters can be used in conjunction with a power supply (above) but can only be used as a secondary supply.

Diode Module

Model	Part Number	Description	Ship Weight
N/A	009934-001*	DIODE REDUNDANCY MOD W/MTG BKT	2.0 lb (0.90 kg)
N/A	009934-002	DIODE REDUNDANCY MOD DIN RAIL	2.0 lb (0.90 kg)

*For FM/USCG approved system

NOTE: Required for use with power supplies/converters listed above.

EQ2220GFM Ground Fault Monitor (Spec Sheet: 90-1134) provides ground fault monitoring in a system that includes reliable dual isolated 24 Vdc power. The output from the ground fault monitor is a contact closure in the presence of a ground fault. The ground fault monitor is DIN rail mountable and is intended to be mounted in the same enclosure as the controller.

Ground Fault Monitor (For use with power supplies above)

Model	Part Number	Description	Ship Weight
EQ2220GFM	007941-001	Ground Fault Monitor	0.5 lb (0.2 kg)
EQ2220GFMR	007941-901	Ground Fault Monitor	0.5 lb (0.2 kg)

Power Supplies

EQ3900RPS (Manual: 95-8745) The EQ3900RPS Remote Power Supply is an industrial power supply that accepts two independent AC inputs and produces 24 Vdc with up to 18 amperes output current. The EQ3900RPS remote power supply can be configured with various numbers of 24 Vdc power outputs, fuse monitoring, and status indicators. It is intended for use in hazardous locations, with certification for Class I, Division 1 and Class I, Division 2 per the National Electrical Code.

MODEL	DESCRIPTION
EQ3900	Equipment based System Enclosures intended for Hazardous Locations
	TYPE ENCLOSURE
	E Explosion-proof (Class I, Division 1)
	N Non-Incendive (Class I, Division 2)
	TYPE 24 VDC POWER OUTPUTS (Notes 1 & 2)
	1 1 24Vdc Power Output (18 Amp Fuses)
	2 2 24Vdc Power Outputs (9 Amp Fuses)
	3 3 24Vdc Power Outputs (6 Amp Fuses)
	TYPE FUSE MONITORING (Notes 2 & 3)
	0 0 Fuse Monitoring
	1 1 Fuse Monitoring (Power Outputs: #1)
	2 2 Fuse Monitoring (Power Outputs: #1& #2)
	3 3 Fuse Monitoring (Power Outputs: #1,#2,& #3)
	TYPE INDICATIONS (More than one can be chosen) (Notes 3 & 5)
	N No Indicator or Operator
A Power Present Indicator	
B Power Trouble Indicator	
C Ground Fault Indicator	
D Ground Fault Test Operator	
TYPE WINDOW	
N No Window	
W Window	

- NOTES:**
1. Maximum total current draw = 18 amperes. All power outputs have same fuse rating.
 2. Fuse monitoring by EQP only. No local indication.
 3. Consult factory if other configuration are desired.
 4. Consult factory for size and number of conduit entries.
 5. No ingress rating if operators are included.

Power Supplies

EQ3770EIO (Manual: 95-8761) The Eagle Quantum Premier EQ3770 EIO Input/Output module for hazardous locations provides an economic solution for field mounted systems and devices. The EIO can be used with most EQ37XX devices, and can be combined with an onboard ground fault monitor.

The enclosure can be configured to house various Eagle Quantum Premier 8 channel IO modules. They are intended for use in hazardous locations, with certifications that include Class I, Division 1 per the National Electrical Code, and Zone 1 per EN/IEC60079-1.

EQ2176PS	000604-036	75A	220/240VAC	50HZ	150 lb (75.0 kg)

*Requires use of EQ2100PSM Power Supply Monitor

Power Supplies

EQ2100PSM Power Supply Monitor (Spec Sheet: 90-1134) is used in conjunction with any of the EQ21XX (p/n 000604-XXX) power supplies and backup batteries to provide an approved source of power for the Eagle Quantum Premier system. Since the power supply monitor resides on the communication loop (LON), any trouble condition related to system power will immediately be reported to the Operator Interface Station through the Local Control Unit. Status conditions being monitored include power supply failure, loss of AC power, loss of battery power, power ground fault, AC voltage, DC voltage, and battery changing current levels.

- Supports ANSI/NFPA 72 Class X communication
- Monitors primary AC supply and battery integrity
- Compatible with 10, 30 and 75 amp output power supplies
- Field addressable
- FM approved and CSA Certified for use in Eagle Quantum
- Feet for panel mounting

Power Supply Monitor (For use with EQ21XX power supplies)

Model	Part Number	Description	Ship Weight
EQ2100PSM	006979-001	Power Supply Monitor	5 lb (2.3 kg)

*Enclosure not included

CONTROL ROOM

Operator Interface Safety System Software

Safety System Software (S³). The Eagle Quantum Premier uses the safety system software to provide a user friendly, fully integrated, high performance package. The software provides convenient and accurate system configuration and status information including diagnostic and trouble shooting tools. An optional embedded OPC server provides additional flexibility.

The software database contains all of the information to easily configure the Eagle Quantum Premier system. All device information is presented in a series of user-friendly point configuration screens. Point display screens for each node are available to display detailed status information, recent alarms and calibration records.

In summary the software collects, tracks, displays, and distributes your safety system information while allowing intuitive operator input for command and control functions of these safety systems.

Operating System Requirements:

The S³ software suite is designed to run on an Intel® based computer with at least a 800 MHz Pentium III processor. S³ is compatible with Windows 7, Windows Vista, Windows XP Professional, and Windows 2000. Computers operating on a 64 bit platform are fully supported; as with many modern software programs, the faster the machine, the better the performance.

The Safety System Software has the following features:

- Configure field devices
- Program, simulate, monitor and document controller logic
- Review real time status through pre-built point displays
- An optional OPC Server license is available

Operating Interface Safety System Software

Part Number*	Description	Ship Weight
007800-011	Safety System Software configuration/runtime package 60 node version no driver , USB key.	0.5 lb (0.23 kg)
007800-013	Safety System Software configuration/runtime package 250 node version no driver , USB key.	0.5 lb (0.23 kg)
007800-012	Safety System Software configuration/runtime package 60 node version with OPC driver , USB key.	0.5 lb (0.23 kg)
007800-014	Safety System Software configuration/runtime package 250 node version with OPC driver , USB key.	0.5 lb (0.23 kg)

NOTE: The 60 node version of S3 is recommended for the 16 node controller.

*It is strongly recommended that purchasers of S3 attend the appropriate training class:

Register at Det-Tronics University from the website: www.det-tronics.com

Package Includes:

- S³ Installation software
- 30 ft. serial cable with DB9 serial and EQP interface connectors
- 30 ft. Ethernet Cable
- Licensed software key (resembles a USB drive)
- High speed USB serial adapter

Course 102: Advanced EQP Training

**COURSE 102:
ADVANCED EQP (FOR CUSTOMERS AND DISTRIBUTORS)**

This 3-day class is designed for System Integration Engineers, Designers, and Maintenance personnel. The curriculum will cover the Eagle Quantum Premier System hardware, software, configuration, logic programming, troubleshooting, maintenance, and design practices. This course does not apply to other standard flame and gas detection systems.

EQP Training

DEVICES

EQ3760 Addressable Smoke Module

The EQP **Addressable Smoke Module** (Spec Sheet: 90-1226) is designed to expand the input and output capability of the Det-Tronics EQP system.

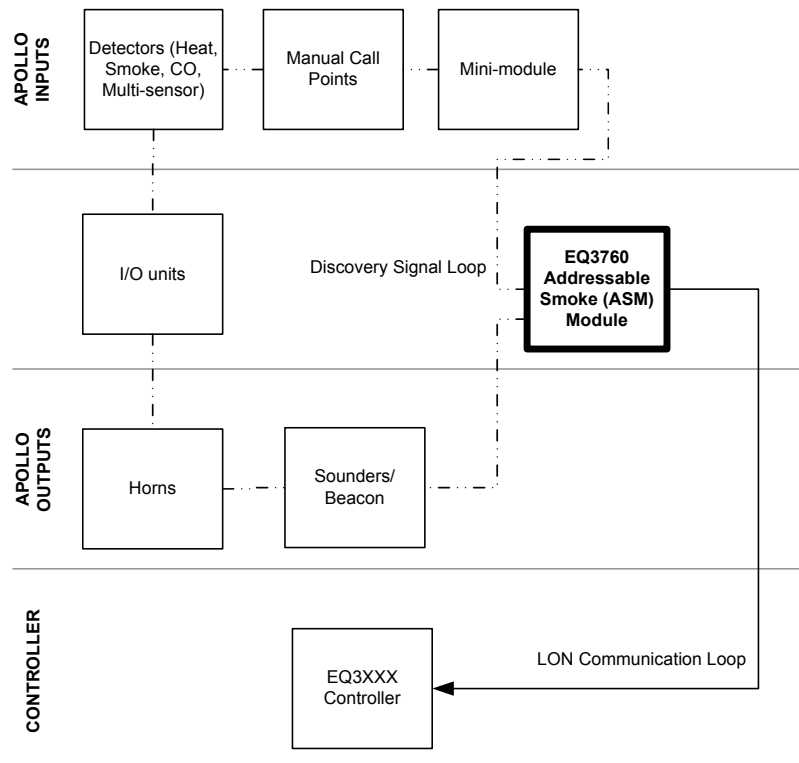

The ASM is an interface device designed to provide continuous and automated fire protection. It ensures system operation through continuous supervision of system inputs/outputs and Local Operating Network/Signaling Line Circuit (LON/SLC) monitoring in the controller.

The ASM is located directly on the LON of the EQP system, with a loop of up to 100 addressable devices tied into the ASM. This allows the EQP controller to annunciate a fire alarm from either its own LON based I/O or from the ASM connected addressable smoke and heat detection loops.

System status can be determined using the troubleshooting procedures, Eagle Quantum Safety System Software (S³), and the status indicators on the module.

- Expands the capabilities of the Det-Tronics EQP system
- Class 1 Div. 2 locations combined with Zone 2 rated devices Type N
- SIL 2 Capable certification
- Provides power and communications to 100 addressable devices
- Uses Apollo Discovery and XP95 smoke and heat detectors
- ASM alarm and fault status are logged in the EQP controller
- LEDs for easy annunciation of power, faults and an active device on the loop
- Monitors single addressable devices
- Provides remote I/O capabilities via LON/SLC
- DIN rail or panel mounting
- Plug-in wiring connectors
- RFI and EMI hardened
- Smoke detectors are globally approved (see product data sheets)
- Option Intrinsically Safe detectors

DEVICES

EQ3730 EDIO Enhanced Discrete Input/Output Module

EQ3730 EDIO Enhanced Discrete Input/Output Module (Spec Sheet: 90-1189)

The 8 Channel EDIO Module is specially designed to expand the input and output (I/O) capability of the Det-Tronics Eagle Quantum Premier System. The unit is designed to provide continuous and automated fire/gas protection while ensuring system operation through continuous supervision of system I/O and signaling line circuit (SLC). The EDIO module provides eight channels of configurable input or output points that can be configured as input/output, two-wire smoke/heat detector, Class A input, Class A output. Each input point can accept fire detection devices such as heat, smoke, or ionized flame detectors. Each output point can be configured for signaling or releasing output operation. Each channel on the module is provided with individual indicators for active and fault conditions.

- Monitors eight independent I/O channels
- IDC Class A or B wiring
- Class 1 Div. 2 locations combined with Zone 2 rated devices Type N
- Individual channels are configurable as an input/output/two-wire smoke/heat detectors/ Class A input/Class A output
- A smoke/heat channel can support up to 15 two-wire smoke and heat devices per channel
- For Class A input and output wiring two channels are required per Class A circuit
- Models with SIL 2 certification
- Individual point style is configurable as a supervised or an unsupervised point
- User configurable supervision for opens and/or shorts
- Individual point type is configurable for alarm/supervisory/other input styles, notification/releasing/dry contact output
- Exceeds the requirements of NFPA 72
- Panel or DIN rail mounting

EQ3700 DCIO Discrete Input/Output Module

EQ3700 DCIO Input/Output Module (Spec Sheet: 90-1149) The 8 Channel DC I/O Module is specially designed to expand the Input and Output (I/O) capability of the Det-Tronics Eagle Quantum Premier System. The unit is designed to provide continuous and automated fire/gas protection while ensuring system operation through continuous supervision of system I/O and signaling line circuit (SLC). The DCIO module provides eight channels of configurable I/O points that can be programmed for supervised or unsupervised operation. Each input point can accept fire detection devices such as heat, smoke, or unitized flame detectors. Each output point can be configured for signaling or releasing output operation. Each channel on the module is provided with individual indicators for active and fault conditions.

- Monitors eight independent I/O channels
- IDC Class B wiring
- Class 1 Div. 2 locations combined with Zone 2 rated devices Type N
- Individual channels are configurable as an Input or Output
- Individual point Style is configurable as a supervised or an unsupervised point
- Individual point Type is configurable for alarm/supervisory/other input styles, notification/releasing/dry contact output
- Meets the requirements of NFPA 72
- Panel or DIN rail mounting

DEVICES

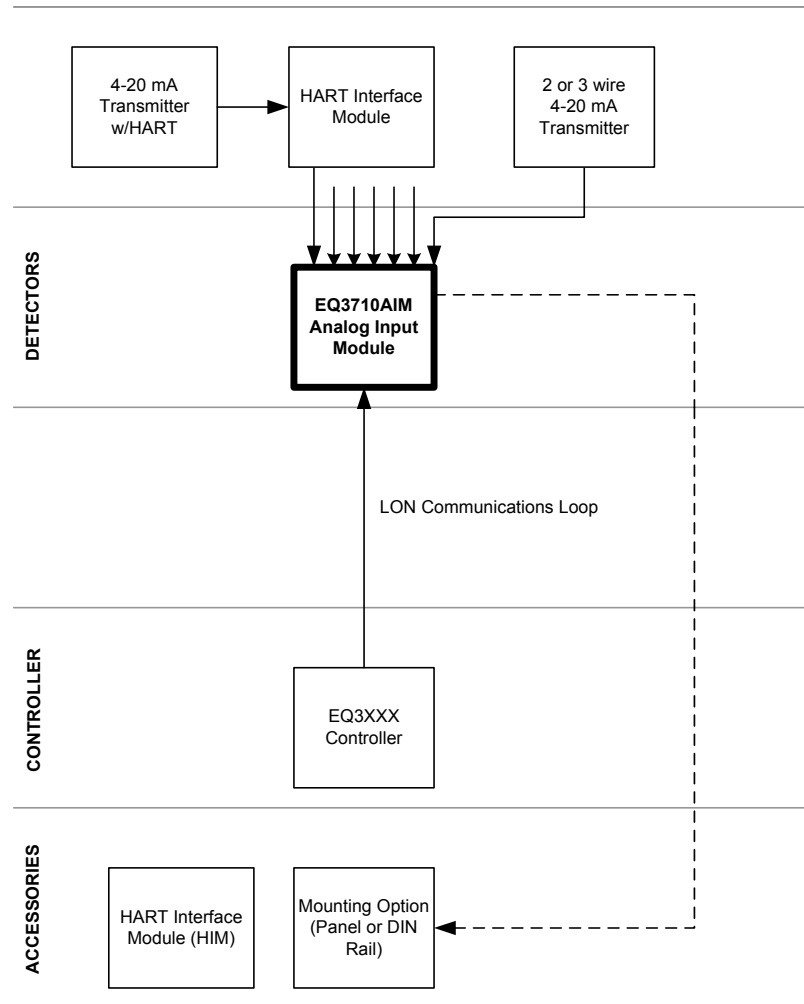

EQ3710 AIM Analog Input Module

EQ3710 AIM Analog Input Module (Spec Sheet: 90-1183). The 8 Channel Analog Input Module expands the input capability of the Det-Tronics Eagle Quantum Premier System. The unit provides a means of connecting devices with a 4-20 mA output signal to the Eagle Quantum Premier System.

Each channel is fully configurable to provide device and alarm information. This information includes tag name, descriptor, engineering units, fault alarm, low/high alarm, and alarm threshold limits.

- Compliance to ANSI/ISA-12.13.01, for combustible gas
- Compliance to ANSI/ISA 92.0.01, CSA 22.2 #152, and EN60079-29-1
- NFPA 72 Approved 4-20 mA flame detector input
- Class 1 Div. 2 locations combined with Zone 2 rated devices Type N
- Models with SIL 2 certification
- Monitors eight independent channels
- Panel or DIN rail mounting
- Optional HART Interface module (HIM) available
- Supports 2 or 3 wire 4-20 mA transmitters

DEVICES

EQ3720 RM Relay Module

EQ3720 RM Relay Module (Spec Sheet: 90-1181) The 8 Channel Relay Module is specially designed to expand the output capability of the Det-Tronics Eagle Quantum Premier System. The Relay Module provides eight channels of relay output points that are programmed for unsupervised operation. The output relays are rated up to 2 amps per channel at 30 Vdc maximum or 0.5 amps per channel at 30 Vac.

- Class 1 Div. 2 locations combined with Zone 2 rated devices Type N
- Controls eight independent form “C” relay output channels
- Panel or DIN rail mounting
- “Hold last state” capable
- Recommended for use as an interface to normally energized (fail-safe) systems

DEVICES

FlexVu® UD10-DCU Universal Display

FlexVu UD10-DCU Universal Display (Spec Sheet 90-1200) is recommended for applications that require a gas detector with digital readout of detected gas levels. Its LON interface board makes the FlexVu UD10 compatible with Eagle Quantum Premier systems by digitizing the 4-20 mA analog signal from the attached sensor/transmitter and transmitting the value as a process variable over the LON to the EQP controller. The UD10 is designed for use with a variety of Det-Tronics gas sensors for combustible and toxic detection, GT3000 and C7064E. When used with the EQP controller, it meets all gas performance standards.

- Compliance to ANSI/ISA-12.13.01-2000 performance standard
- Compliance to ISA-92.0.01 Part 1 performance standard, and EN50104 for oxygen depletion
- Performance certified to FM 6310/6320, CSA 22.2 #152, ATEX EN60079-29-1, and IEC60079-29-1
- Division Approval Ratings: FM and CSA
- Zone Approval Ratings: FM, CSA, ATEX, and IECEx
- Accepts 4-20 mA input from a variety of detection devices (gas, flame, pressure, flow, etc.)
- Non-intrusive menu allows device calibration without de-classifying the hazardous area
- Continuously displays gas level, gas type, and units measured
- Alarm setpoints adjustable via network
- Data logger for event time and date stamping
- Heated and backlit display
- IP66 rated
- Emulates the EQ22xxDCU
- Replaces EQ2200 DCU EX

DEVICES

EQ2200UVHT and C7050 Detector

EQ2200UVHT (Manual: 95-8570) combined with the **C7050 Detector** (Manual: 95-8214) on an EQP (or as a replacement on an older EQ system) provides fast, reliable flame detection in a wide variety of applications. The detector has the Automatic **oi** (optical integrity) feature, providing a continuous check of detector optical surfaces, detector sensitivity, and electronic circuitry of the detector/controller system. Not recommended for applications where welding or lightning may be present. For large fixed installations only.

- Replaceable tube module
- External Automatic **oi**
- Internal Automatic **oi**
- Standard temperature option
- High temperature option, 125°C continuous duty
- Variable sensitivities available to match hazard
- FM, CSA, ATEX, CE

DE6598-002	006598-002	Module only				2.5 lb (1.2 kg)

*One (1) Electronic Module (EQxxxxUVHT) is required for use with each C7050B Detector

DEVICES

EQ2400NE Network Extender

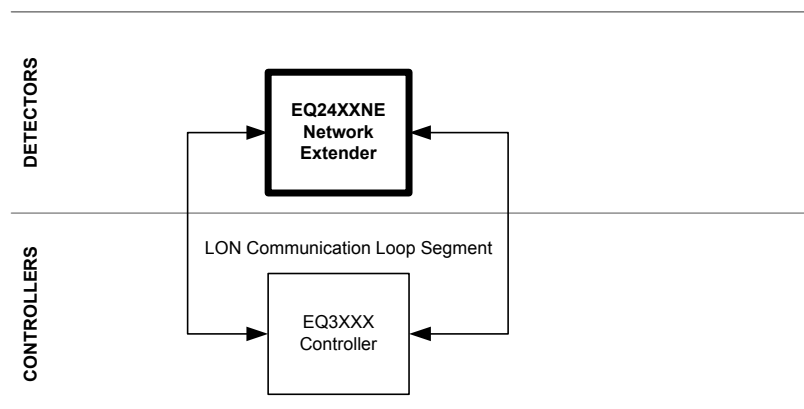

EQ2400NE Network Extender (Spec Sheet: 90-1132) expands the capabilities of the Eagle Quantum Premier system by allowing additional nodes as well as additional wiring to be added to the LON communication loop. Without a network extender, the communication network is limited to 60 nodes on a 2,000 meter loop. Each network extender increases the capacity of the loop by 40 nodes and an additional 2,000 meters of wiring. The maximum system size is 246 field nodes and 10,000 meters of wiring. To ensure optimum performance, it is important to distribute the network extenders along the loop so that no more than 40 nodes or 2,000 meters of wiring are on either side of a network extender.

Network extender circuitry supports communication in both directions. If a network fault should occur, uninterrupted communication can continue in the opposite direction.

- Increases network capacity by 40 nodes per unit (system maximum = 246)
- Each extender increases wiring length by 2,000 meters
- Visual indication of network traffic
- Up to 6 extenders can be added per system

EQ2400PLR Physical Layer Repeater

EQ2400PLR Physical Layer Repeater (spec sheet 90-XXXX) is a repeater module that is connected between two network segments. A network segment is defined as the segment between two network extenders or the segment between an EQP controller and a network extender. The purpose of the physical layer repeater is to eliminate communication interference resulting from network wiring opens caused by a break in the wire or a bad connection. An open wire will result in the reflection of the network signal back along the network wiring segment. This interference has the potential to cause a network device to fault isolate. This will occur at a device located at a certain distance from the network open. Typically the distance lies between 350 and 500 meters and is dependent upon the electrical characteristics of the network cable.

- Suppresses reflection.
- Amplifies signal.

EQ24XX PLR Physical Layer Repeater

DEVICES

Risk Area Heat Detector Model HD

The **Risk Area Heat Detector** (Spec Sheet: 90-1211) accurately senses the surrounding air temperature and actuates an electrical contact output at a pre-determined temperature.

The SIL 2 certified heat detector can be used as an alarm device to sense excessive heat or fire and warn personnel, or it can be used as a signaling device to sense fire and send a signal to an alarm panel for actuation of a fire suppression system.

The design of the heat detector utilizes Rate Compensation, which provides enhanced performance when compared to fixed-temperature or rate-of-rise detectors. The Model HD Detector senses the surrounding air temperature and actuates its output when the temperature reaches the pre-determined level, regardless of the fire growth rate. The unique properties of the alloy outer shell allow the Model HD to respond more quickly as the fire growth rate increases; i.e. the faster the fire grows, the sooner the unit will react.

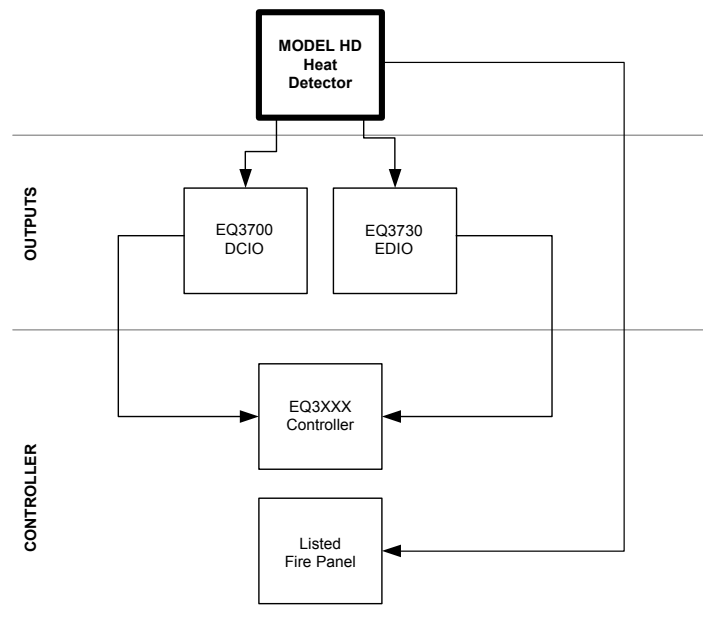

The device is furnished with an explosion-proof junction box. The detector's electrical contact is factory wired to a screw terminal block located within the junction box. All external wiring to the device is also connected to this terminal block. The screw terminals accept wiring from 12 to 24 AWG. The junction box is available in aluminum or stainless steel, with two or four conduit entries, and either 3/4 inch NPT or 25 mm threads.

The Model HD is ideally suited for use in hazardous (classified) locations.

- SIL 2 certified repeatable - resets itself, nothing to replace, testable
- Rugged - withstands shock and vibration
- Versatile - various temperature settings available
- Economical - wide spacings reduce installation costs
- Factory set internal contact area is hermetically sealed in stainless steel
- Ease of wiring and installation
- Aluminum or stainless steel junction box, stainless steel heat detector
- Approved and certified to FM, CSA, and ATEX Hazardous Location standards
- Compatible with EDIO, DCIO, and IDC LON devices

APPLICATIONS

- Turbine enclosures
- Confined spaces and dirty environments
- Fuel cells
- Gas compressors
- Hydraulic or lube pump locations
- Power generation
- Gas station islands
- Miscellaneous industrial processes
- Anywhere fire can occur

Risk Area Heat Detector Model HD 450 - 725 Degrees

NOTE: See HD Model Matrix (page C.22) for configuring higher temperature models.

DEVICES

Smoke and Heat Detectors for Unclassified Areas (non-addressable)

Heat Detectors for Unclassified Areas

Part Number	Description	Ship Weight
000119-005	Heat Detector Base, 4-wire with aux. relay, remote LED & remote test capabilities, UL	0.5 lb (.23 kg)
000119-021	Heat Detector Base, 2-Wire for electronic heat detectors, remote LED & test capabilities, cULus	0.5 lb (.23 kg)
000120-149	Heat Detector, 135°F (57°C), electronic, fixed type with 15°F (8°C) rate-of-rise, general purpose, cULus/FM/CSFM/MEA	2.2 lb (1 kg)
000120-150	Heat Detector, 135°F (57°C), electronic, fixed type, general purpose, cULus/FM/CSFM/MEA	2.2 lb (1 kg)

NOTE: Average lead time is 4-6 weeks. For additional options please consult the factory.

4-Wire Smoke Accessories

Part Number	Description	Ship Weight
102385-002	End of Line Supervisory Relay for 4- wire Smokes	<1 lb (<.45 kg)
000106-108	EOL Resistor, 10K Ohm	<1 lb (<.45 kg)

NOTE: Average lead time is 4-6 weeks. For additional options please consult the factory.

Smoke & Heat Detection Accessories

Part Number	Description	Ship Weight
000161-005	Back Box, surface mount, alloy housing, five 1/2" NPT entries, cULus	1.5 lb (.68 kg)
000116-167	Remote Alarm Indicator, general purpose	0.5 lb (.23 kg)
000119-045	Smoke Detector Test Kit (No-Climb), includes Fiberglass 4 Section Telescopic Pole 14.7ft, Fiberglass Extension Pole 3.7ft, Universal Detector Removal Tool, Aerosol Smoke Dispenser, and Protective Carrying Bag	34 lb (16 kg)
000505-019	End of Line (EOL) Resistor (5.1K), for alarm supervision of smoke & electronic heat detectors	<1 lb (<.45 kg)
000515-095	Smoke Detector Testing Tool	8 lb (3.6 kg)
000515-092	Telescopic Fiberglass Pole, 14.7 Ft	21 lb (9.5 kg)
000119-046	Spare Smoke for Smoke Detector Test Kit	1.5 lb (.68 kg)
000515-097	Heat Detector Test Kit, includes detector test head, two (2) battery batons, and charger	14 lb (6.4 kg)

NOTE: Average lead time is 4-6 weeks. For additional options please consult the factory.

Manual Call Stations (non-addressable)

Class 1, Division 1

Part Number	Description	Ship Weight
000115-195	Manual Pull Station, push button with lift flap (dual action), SPST contact, surface mount, alloy housing painted red, key for reset, 1/2" NPT bottom, includes "FIRE-PUSH BUTTON" label, Class 1, Division 1, Groups C-D, NEMA 4X, UL	5.5 lb (2.5 kg)
000115-003	Manual Pull station, Dual Action Lift and Pull Ring, 3/4" Entry, Class 1, Division 1, SPDT Contacts, Groups C & D, Aluminum material, UL, ULC, CSA, CSFM Listed, Red Finish	5.5 lb (2.5 kg)
000115-040	Manual Pull Station, pull ring with lift flap (dual action), SPDT contact, surface mount, Aluminum housing, two 3/4" NPT (F) entries, Class 1, Division 1, Groups B, C, & D, NEMA 4/7/9, ULC, Red Finish	5.5 lb (2.5 kg)
000115-010	Manual Pull Station, Single Action (Dual if used with Lift Flap), DPDT Contacts, Aluminum material, Class 1, Division 1, Groups B, C, & D, NEMA 4X, UL Listed, Red Finish, Model B-9	3.5 lb (1.6 kg)
000210-709	Lift Flap for B-9, "CO2 Release" label	0.5 lb (.23 kg)
000115-011	Lift Flap for B-9, "FIRE ALARM" label	0.5 lb (.23 kg)
000115-012	Lift Flap for B-9, "FIRE SYSTEM RELEASE" label	0.5 lb (.23 kg)
000115-027	Lift Flap for B-9, "FM-200 Release" label	0.5 lb (.23 kg)

NOTE: Average lead time is 4-6 weeks. For additional options please consult the factory.

Class 1, Division 2

Part Number	Description	Ship Weight
000115-053	Manual Pull Station, pushbutton type with lift flap (dual action), Class 1, Division 2, Groups A, B, C, & D, NEMA 4X, SPST contact, surface mount, GRP housing painted red, key for reset, two 1/2" NPT (F) entries, includes "FIRE ALARM" label and 10K EOL resistor, UL	2.7 lb (1.3 kg)
000115-054	Manual Call Station, break glass type, SPST contact, Class 1, Division 2, Groups A, B, C, & D, NEMA 4X, SPST contact, surface mount, GRP housing painted red, key for test, two 1/2" NPT (F) entries, includes "FIRE BREAK GLASS" label, no EOL resistor, UL	2.7 lb (1.3 kg)

NOTE: Average lead time is 4-6 weeks. For additional options please consult the factory.

General Purpose

Part Number	Description	Ship Weight
000515-012	Manual Pull Station, Dual Action w/ Labels, DPST Contacts, Red Finish, Model 3300	1.2 (.6 kg)
000115-051	Manual Pull Station, Dual Action w/ Labels, SPST Contacts, Red Finish, Model 3300	1.2 (.6 kg)
000515-013	Weatherproof Backbox for 3300 Pull Station	1 lb (.45 kg)
000515-014	Indoor Backbox for 3300 Pull Station	0.5 lb (.23 kg)

NOTE: Average lead time is 4-6 weeks. For additional options please consult the factory.

Accessories

Part Number	Description	Ship Weight
000115-028	Glass Breakrods for B-9 (10 Pk)	0.5 lb (.23 kg)
000515-015	Glass Breakrods for 3300 Pull Station (12 Pk)	0.5 lb (.23 kg)
000515-016	Spare Key for 3300 Pull Station	0.5 lb (.23 kg)
000106-108	EOL Resistor, 10K Ohm	<1 lb (<.45 kg)

NOTE: Average lead time is 4-6 weeks. For additional options please consult the factory.

DEVICES

Horns (non-addressable)

Class 1, Division 1

Part Number	Description	Ship Weight
000122-144	Horn, 27 Tones, marine grade alloy, Up to 100+/-3dB, UL Class 1, Division 1, Groups C & D, NEMA 4x, Voltage: 24VDC, Cable Entries: 1x3/4" NPT LHS, 1x3/4" NPT RHS, Duty Label: None, Tag Label: None, Other Features: None, Finish: Red Finish	12.3 lb (5.6 kg)
000122-098	Horn, Alloy, Up to 100+/-3dB, UL Class 1, Div 1, Groups C & D, NEMA 4x, 24VDC, 3/4" NPT bottom entry, No duty or tag label, Fitted with 10K EOL Resistor), Red finish	12.3 lb (5.6 kg)
000122-024	Horn, Explosion Proof, Class 1, Division 1, 24 Vdc, 3/4" Entry, 100 dB @ 10 ft., UL, cUL, CSFM	10.3 lb (4.7 kg)
000122-036	Siren, Explosion Proof, Class 1, Division 1, Groups B, C, & D, 4 Selectable Tones, 24 Vdc, 108 dB @ 10 ft., NEMA 4X, UL, cUL	23 (10.5 kg)

NOTE: Average lead time is 5-6 weeks. For additional options please consult the factory.

Class 1, Division 2

Part Number	Description	Ship Weight
000122-079	Horn, up to 115 dB, UL Class 1 Division 2, Class 1 Zones 1 & 2, NEMA 4X & 6, GRP material, 24 Vdc, no labels, one (1) 1/2" NPT entry, no special features, red finish	13.2 lb (6 kg)
000122-074	Horn, up to 118dB(A), GRP, UL Class 1 Division 2, Class 1 Zones 1 & 2, Class II Div 2, Groups F & G, NEMA 4x & 6, Voltage: 12V-48V d.c, Labels: None, Entries: 2x1/2" NPT, Options: None, Color: Painted Red	13.2 lb (6 kg)
000122-099	Horn, up to 118dB, GRP material, Certified EExd IIC T5, ATEX approved Ex II 2GD, IP66 & 67, 24 Vdc, No labels, two M20 entries, Natural Black finish	13.2 lb (6 kg)
000122-031	Alarm Horn, Class 1, Division 2, Groups A, B, C, & D, 24 Vdc, 0-110 dB @ 10 ft., NEMA 4X, UL, ULC, CSFM (requires tone module)	6.1 lb (2.7 kg)
000122-052	Universal Tone Module, 32 switchable Tones, UL, ULC, CSA, CSFM	0.5 lb (.23 kg)
000106-108	End of Line (EOL) Resistor, for supervision of end devices, 10K Ohm	<1 lb (<.45 kg)

NOTE: Average lead time is 5-6 weeks. For additional options please consult the factory.

General Purpose

Part Number	Description	Ship Weight
000122-039	Horn, 80 to 92 dB @ 10 ft, surface mount, diode polarized, UL Listed	1 lb (.45 kg)
000122-037	Indoor backbox, general purpose	0.5 lb (.23 kg)
000122-033	Horn, 24 Vdc, Non-Polarized, general purpose, Model 450	1.5 lb (.68 kg)
000122-034	Panel Mount Gasket Kit, 350/450	0.5 lb (.23 kg)
000122-035	Back Box for 450 Horn	1 lb (.45 kg)

NOTE: Average lead time is 5-6 weeks. For additional options please consult the factory.

Accessories

Part Number	Description	Ship Weight
000106-108	EOL Resistor, 10K Ohm	<1 lb (<.45 kg)

NOTE: For additional options please consult the factory.

Strobes (non-addressable)

Class 1, Division 1

Part Number	Description	Ship Weight	Detail
000121-121*	Xenon Strobe (5 Joule), NEMA 4X & 6, Alloy, UL Class 1, Division 1, Groups C & D, 24 Vdc, Red lens with no guard, 1/2" entries, No duty or Tag labels, Red finish	4.5 lb (2 kg)	SM87
000121-116*	Xenon Strobe 21 Joule, NEMA 4X & 6, UL Class 1, Division 1, Groups C & D, 24 Vdc, 3/4" NPT Entry, 60 flash per minute, Clear Lens with no lens guard, no duty or tag label, Alloy material, Red finish	14.5 lb (6.6 kg)	XB4
000121-028**	Strobe, Amber Lens, Class 1, Division 1, Groups C & D, 24 Vdc, 80 flash per minute, 3/4" NEMA 4X, UL, ULC, CSA, CSFM	18 lb (8.2 kg)	27XST
000121-029**	Strobe, Red Lens Class 1, Division 1, Groups C & D, 24 Vdc, 80 flash per minute, 3/4" NEMA 4X, UL, ULC, CSA, CSFM	18 lb (8.2 kg)	27XST
000121-030**	Strobe, Blue Lens Class 1, Division 1, Groups C & D, 24 Vdc, 80 flash per minute, 3/4" NEMA 4X, UL, ULC, CSA, CSFM	18 lb (8.2 kg)	27XST

NOTE: Average lead time is 5-6 weeks. For additional options please consult the factory.

*Stand-alone device

**Mounting accessory required

Accessories

Part Number	Description	Ship Weight
000121-054	Ceiling Mount for 27XST, Federal CMXC	1.5 lb (.68 kg)
000121-331	Wall Mount for 27XST, Federal WMXC-SB	1.5 lb (.68 kg)
000121-318	Pendant Mount for 27XST, Federal PMXC-S8	1.5 lb (.68 kg)
000121-319	Dome Guard for 27XST, Federal DGXC-SB	<1 lb (<.45 kg)

NOTE: Average lead time is 5-6 weeks. For additional options please consult the factory.

DEVICES

Strobes (non-addressable) Continued...

Class 1, Division 2

Part Number	Description	Ship Weight
000121-155	Strobe, Xenon type, 15 Joule, 24 Vdc, Pipe mount, 3/4" NPT (F) entry, natural black GRP housing, 60 flashes per minute, diode polarized, red lens with wire guard, Class 1, Division 2, Groups A-D, NEMA 4X, cULus	5.8 lb (2.6 kg)
000121-166	Strobe, Xenon type, 15 Joule, 24 Vdc, Pipe mount, 3/4" NPT (F) entry, natural black GRP housing, 60 flashes per minute, diode polarized, blue lens with wire guard, Class 1, Division 2, Groups A-D, NEMA 4X, cULus	5.8 lb (2.6 kg)
000121-156	Strobe, Xenon type, 15 Joule, 24 Vdc, Pipe mount, 3/4" NPT (F) entry, natural black GRP housing, 60 flashes per minute, diode polarized, amber lens with wire guard, Class 1, Division 2, Groups A-D, NEMA 4X, cULus	5.8 lb (2.6 kg)
000121-163	Strobe, Xenon type, 15 Joule, 24 Vdc, pipe mount, 3/4" NPT (F) entry, natural black GRP housing, 60 flashes per minute, diode polarized, clear lens with wire guard, Class 1, Division 2, Groups A-D, NEMA 4X, cULus	5.8 lb (2.6 kg)
000121-133	Strobe, Clear Lens, Class I, Division 2, 4-wire with supervisory diode, NEMA 4X, 24 Vdc, 80 flash/per minute, 1/2" Pipe Mount, UL, ULC, CSA, CSFM	2 lb (.9 kg)
000121-122	Xenon Strobe 5 Joule, ATEX Approved Ex II 2GD, EExd IIB T5, IP66 & 67 GRP Material, two M20 entries, 24 Vdc, 60 flash per munite, Red Lens with guard, Backstrap mounting, No duty or tag labels, Red finish	5.5 lb (2.5 kg)
000121-031	Strobe, Red Lens, 24 Vdc, 4X, Class 1, Division 2, Groups, A, B, C, & D, UL, cUL CSA, non-polarized	1.5 lb (.68 kg)
000121-035	Strobe, Amber Lens, 24 Vdc, 4X, Class 1, Division 2, Groups, A, B, C, & D, UL, cUL CSA, non-polarized	1.5 lb (.68 kg)
000121-037	Strobe, Blue Lens, 24 Vdc, 4X, Class 1, Division 2, Groups, A, B, C, & D, UL, cUL CSA, non-polarized	1.5 lb (.68 kg)

NOTE: Average lead time is 5-6 weeks. For additional options please consult the factory.

General Purpose

Part Number	Description	Ship Weight
000121-073	Strobe, NEMA 4X, Xenon type, 2.2 Joule, 1/2" pipe mount, 24 Vdc, red lens, UL/ULc/CSA, non-polarized	<1 lb (<.45 kg)
000121-115	Strobe, NEMA 4X, Xenon type, 2.2 Joule, 1/2" pipe mount, 24 Vdc, blue lens, UL/ULc/CSA, non-polarized	<1 lb (<.45 kg)
000505-005	End of Line / Polarizing Assembly, 10k Ohm	<1 lb (<.45 kg)
000121-038	Strobe, White Lens, 24 Vdc, 1/2" Pipe Mount, 300 Candlepower, NEMA 4X, UL, cUL, CSA, non-polarized	2 lb (.9 kg)
102778-003	Strobe, Blue Lens, 24 Vdc, 1/2" Pipe Mount, 300 Candlepower, NEMA 4X, UL, cUL, CSA, non-polarized	2 lb (.9 kg)
102778-004	Strobe, Red Lens, 24 Vdc, 1/2" Pipe Mount, 300 Candlepower, NEMA 4X, UL, cUL, CSA, non-polarized	2 lb (.9 kg)
000121-069	Strobe, Amber Lens, 24 Vdc, 1/2" Pipe Mount, 300 Candlepower, NEMA 4X, UL, cUL, CSA, non-polarized	2 lb (.9 kg)

NOTE: Average lead time is 5-6 weeks. For additional options please consult the factory.

Combination Horn/Strobe

Class 1, Division 2

Part Number	Description	Ship Weight
000121-075	Horn/Strobe Combination Unit Consisting of the following: Xenon Strobe, 5 Joule, Class 1, Division 2, NEMA 4X & 6, GRP Material, two (2) 1/2" NPT entries, 24 Vdc, 60 flash/minute, red lens with guard, no labels, red finish Sounder, up to 115 dB, Class 1 Division 2, Class 1 Zones 1 & 2, NEMA 4X & 6, GRP material, 24 Vdc, no Labels, one (1) 1/2" NPT entry, no special features, red finish 2-Way Baseplate	23 lb (10.5 kg)
000121-079	Horn/Strobe Combination Unit Consisting of the following: Xenon Strobe, 5 Joule, ATEX Approved Ex II 2G, EExd IIB T5, IP66 & 67, GRP Material, 24 Vdc, 60 flash/minute, red lens with guard, two (2) 20 mm entries, no labels Sounder, Up to 115 dB, ATEX Certified EExd IIC T5, IP66 & 67, GRP material, 24 Vdc, no labels, one (1) 20 mm entry, no special features, red finish 2-Way Baseplate	23 lb (10.5 kg)

NOTE: Average lead time is 5-6 weeks. For additional options please consult the factory.

General Purpose

Part Number	Description	Ship Weight
000122-078	Horn/Strobe, outdoor general purpose, clear lens labeled "FIRE", requires outdoor backbox	1.5 lb (.68 kg)
000121-120	Horn/Strobe, indoor general purpose, clear lens labeled "FIRE", requires indoor backbox	1.5 lb (.68 kg)
000122-037	Indoor/outdoor backbox (use with 000122-078 or 000121-120)	<1 lb (<.45 kg)

NOTE: Average lead time is 5-6 weeks. For additional options please consult the factory.

Accessories

Part Number	Description	Ship Weight
000106-108	000106-108 End of Line (EOL) Resistor, for supervision of end devices, 10K Ohm	<1 lb (<.45 kg)

NOTE: For additional options please consult the factory.

DEVICES

Model GP16XX Gas Panel

Model GP16XX Gas Panel (Spec Sheet: 90-1210) is an economical system package, designed for selected gas detection applications.

- EQP Controller and components approved to ANSI/ISA12 and 92, FM 3610-6, CSA22.2, EN60079-29-1.
- Utilizes Eagle Quantum Premier (EQP)
- 16 gas detection points available
- Flexible device communication protocol (LON and/or 4-20 mA)
- User friendly HMI touch screen
- User configurable
- User defined alarm set-points
- Sounder on panel
- 24.0 in (60.96 mm) x 24.0 in (60.96 mm) x 6.4in (16.2 mm)
- Two Low Alarm / Two High Alarm relays offered via the EQP controller

Model GP16XX Gas Panel

MODEL GP16XX INCLUDES

Below is a list of system components that are included or optional in the Model GP16XX Gas Panel system:

- EQP Controller – Supports up to 16 points of gas (included)
- EQ3710 AIM – Analog Input Module (optional, up to qty 2)
- EQ2220 GFM – Ground Fault Monitor (included)
- Power Supply – 24 Vdc, 10A (included)

EQP SYSTEM COMPONENTS

Below is a list of field devices compatible with the Model GP16XX Gas Panel system:

- PIRECL – PointWatch Eclipse
- UD10-DCU – FlexVu Universal Display
- Any 4-20 mA Device (via Analog Input Module)

SERVICES

3D Flame and Gas Mapping

DESCRIPTION OF SERVICE

The **3D Flame and Gas Mapping** service combines Det-Tronics expertise and proven detection technologies along with 3D mapping software to provide quantitative coverage analysis to ensure optimized detector placement. The 3D Flame and Gas Mapping service can help identify undetected hazards which may lead to a compromise in safety. The hazards include:

- Blind spots with zero coverage
- Lack of adequate coverage in high risk areas
- Obstructions in a detector's field of view

DELIVERABLES

A statistical analysis assessment report and a comprehensive flame and gas detector placement guide are provided upon completion of the analysis.

PROCESS

The 3D Flame and Gas Mapping solution requires Det-Tronics in-house experts to:

1. Consult and gather customer process data and requirements
2. Conduct safety analysis of requirements and process data using a 3D software mapping tool to determine detector placement
3. Identify zero coverage areas
4. Define coverage per detector

Information required from the customer includes:

- 3D model of process being mapped (see Pricing section for 2D to 3D conversion rates if 3D model not available)
- Hazard assessment
- Environmental attributes
- AHJ requirements

PRICING

Please contact the local Regional Sales Manager for a 3D Flame and Gas Mapping quotation.

If a 3D model of the process does not exist, Det-Tronics in-house expertise can convert 2D drawings into 3D models. Engineering labor rates will apply. Consult the local Regional Sales Manager for details.

2019 Det-Tronics University Field Training Rate Schedule

Training Deliverables

All courses provide verbal presentation, practical hands-on with applicable equipment or software, course material handouts, and respective product documentation for each participant. Certificates of Completion are issued on request.

Factory-Certified Technical Trainer Rates

On-Site Per Day Rate (not to exceed 4 persons or 8 hours).....	\$1,768.00
Day Rate for Each Additional Person (not to exceed 10 total persons)	\$442.00
Webinar/Phone Training Hourly Rate.....	\$208.00
Custom Course Development Hourly Rate	\$260.00
Custom Demonstration Setup (Requiring Project Engineering) Day Rate	\$1,768.00
On-Site Hourly Rate.....	\$221.00
Time and One-Half	\$331.50
Double Time	\$442.00
Travel Per Hour Rate	\$156.00

- NOTES:**
- Prices are effective February 1, 2019 and subject to change without notice.
 - Customer cancellations received less than 14 days from the scheduled delivery date may be subject to a charge of up to 30% of the purchase order price.

Travel, Shipping, and Living Expenses

Airfare, Auto Rental, Parking, Tolls, Hotel, Meals, etc. Cost +10%
 Mileage..... Based on the IRS rate for the year incurred +10%
 Shipping (each 2-person training demo kit weight can reach 100 lb)..... Cost +10%
 Det-Tronics will supply receipts and documentation for the substantiation of reasonable travel and living expenses. These shall include air travel, hotel receipt, meals, car rental if used and misc expenses.

Workday Defined

The above charges are for a normal eight-hour working day with time and one-half charged for Saturdays, and time over eight (8) hours for a weekday; Sundays and holidays and work after twelve (12) continuous hours will be charged at double time.

NOTES

- Det-Tronics personnel are not required to work more than 12 hours in any 24-hour period.
- Double time applies to all work/travel performed on Sundays, holidays, and work after 12 continuous hours.
- Det-Tronics personnel are not required to work more than 12 hours in any 24-hour period.
- All weekday or weekend travel time is chargeable per the above notes.
- Eight-hour minimum charge for all one-day sessions with four-hour minimum per day thereafter.
- Hazardous Duties, Offshore or other duties defined as hazardous (offshore platforms, chemical exposure, etc.) are subject to an additional charge of \$200 per day above the standard daily rate.
- Requests for training at locations deemed to be hazardous by Det-Tronics/UTC (offshore platforms, dangerous chemical exposure, political unrest, etc.) or to be performed in a Travel Warning/Travel Alert location may be subject to additional charges, subcontracted, delayed, or cancelled.

Det-Tronics Factory Holidays*

New Year	Memorial Day	Christmas + 1
Martin Luther King Day	Independence Day + 1	New Year's Eve
Presidents' Day	Labor Day	
Good Friday	Thanksgiving + 1	

*Check with factory for a list of 2019 holidays.

Training Event Scheduling

Typically scheduled within 8-12 weeks of receiving purchase order; dependent on trainer and equipment availability.

Terms of Payment

Purchase Orders must be received prior to shipping equipment and conducting training sessions. Fax to 952-829-8750 or email: Orders@Det-Tronics.com
 Training Invoices are due and payable upon receipt. International Training Support is by Letter of Credit or Prepaid (estimated amount).

SERVICES

2019 Field Services Rate Schedule

Field Service Engineer and Project/Software Engineer

Rates	Field Service Engineer	Project/Software Engineer	Specialist
On Site Per Day Rate	\$1,560.00	\$1,768.00	\$2,080.00
On Site Per Hour Rate	\$195.00	\$221.00	\$260.00
Time and One-Half	\$292.50	\$331.50	\$390.00
Double Time	\$390.00	\$442.00	\$520.00
Travel Per Hour Rate	\$124.80	\$156.00	\$182.00

1. Time and one-half applies to all work / travel performed after 8 hours per day or on Saturday.
2. Double time applies to all work/travel performed on Sundays, holidays, and work after 12 continuous hours.
3. Det-Tronics personnel are not required to work more than 12 hours in any 24-hour period.
4. All weekday or weekend travel time is chargeable per the above notes.
5. Eight-hour minimum charge for all one-day service calls with four-hour minimum per day thereafter.
6. Requests for service work at locations deemed to be hazardous by Det-Tronics/UTC (offshore platforms, dangerous chemical exposure, political unrest, etc.) or to be performed in a Travel Warning/Travel Alert location may be subject to additional charges, subcontracted, delayed, or cancelled.

Det-Tronics Factory Holidays*

New Year	Memorial Day	Christmas + 1
Martin Luther King Day	Independence Day + 1	New Year's Eve
Presidents' Day	Labor Day	
Good Friday	Thanksgiving + 1	

*Check with factory for a list of 2019 holidays.

Workday Defined

The above charges are for a normal eight-hour working day with time and one-half charged for Saturdays, and time over eight (8) hours for a weekday; Sundays and holidays and work after twelve (12) continuous hours will be charged at double time. In addition, the travel and living expenses will be billed at cost, plus 10%. Det-Tronics will supply receipts and documentation for the substantiation of reasonable travel and living expenses. These shall include (1) air travel receipt if used, (2) hotel receipt if used, and (3) car rental receipt if used. No other receipts for living expenses will be furnished unless specifically requested by the purchaser in writing prior to the start of the assignment.

Time Sheets

Before the work commences, satisfactory arrangements must be made with Det-Tronics to review and sign Daily Time Sheets. It is suggested that customer submit a written document to Det-Tronics stating whether the customer or their authorized representative will be signing the time sheets. Disputes of any nature should be immediately reported, in writing, to Det-Tronics. Approval and acceptance of the work will be assumed that if no arrangements have been made to sign the time sheets and invoicing will be submitted accordingly. Once signed, the time card is considered as acceptance of the work performed.

Expenses

Expense	Rates
Travel	At Cost +10%
Shipping	At Cost +10%
Living Expenses	At Cost +10%
Mileage	Based on the IRS rate for the year incurred +10%

Terms of Payment

Purchase Orders must be received prior to shipping equipment and/or scheduling service. Fax to 952-829-8750 or email: Orders@Det-Tronics.com. Invoices are due and payable upon receipt. International Field Service Support is by Letter of Credit or Prepaid (estimated amount).

Repair Center Services

Refer to Customer care/technical support & repairs official web page (www.det-tronics.com) for RMA Services process forms, policies, terms, and repairable/non-repairable products list.

SERVICES

Repairs

REPAIR CENTER

Available only for active models listed in this price schedule. Before returning equipment for repair, contact Detector Electronics Customer Service Department to obtain a Return Material Authorization (RMA) number that will be reserved for your specific return order, and referenced in all documentation. Pack the return shipment carefully to avoid damage in transit. Place the RMA number, with your name and address as sender, plainly on the outside of the package.

FACTORY REPAIR PRICING POLICY

Det-tronics Factory Repair Center utilizes standardized repair service pricing that characterizes product repair and testing fees by product class (groupings of similar products) for approved Repair Material Authorization (RMA) returns.

An authorized purchase order for the amount of the standard product class pricing is required prior to the Repair Center issuing an RMA identification number. All equipment returned within an approved RMA is to be shipped freight pre-paid to the Repair Center, and equipment return freight costs and any required sales tax will be added to invoice when applicable at actual cost.

Testing fees apply to non-warranty products tested and not repaired, or products subsequently found compliant with factory manufacturing quality & test parameters, eg no problem found. Testing fees will be waived if the customer property is repaired or a replacement item is purchased as part of the same transaction. All equipment requiring major component/ assembly replacement such as pc boards or sensor modules will be invoiced at actual time and material cost as required to repair the product.

Typical equipment repair turn-around time ranges from one to four weeks after receipt at Repair Center, contingent upon prior RMA approval and provision of an accurate, concise description of the product problems or symptoms observed by the customer

Customer property returned to the Repair Center without an RMA identification number, authorized purchase order, or without any description of the product problem or symptoms will be handled on a case by case basis and special handling charges may apply.

Customer approval will be sought before proceeding if the repair costs fall out of our standard product class repair cost guidelines. Products returned for repair that do not fall into one of the defined product classes will be charged at 40 percent of the current list price for that item.

Product Life Cycle Definitions

Active: An active product is one that is being actively promoted, with new versions being released. These products are manufactured on a regular basis and are promoted as the latest technology from Det-Tronics.

Retired Product Status (RPS): An RPS product will continue to be manufactured for a *maximum* of five years after being given this status. No further development work will be done, or new certifications pursued, on RPS products.

Repair Only Status (ROS): An ROS product will no longer be manufactured. An ROS product will remain on this status for a maximum of five years.

Obsolete (OBS): An OBS product will no longer be manufactured or repaired.

Terms and Conditions of Equipment/Hardware Sale

All sales are subject to Det-Tronics' "Terms and Conditions of Sale" found at www.det-tronics.com.

Please visit the website frequently. Det-Tronics reserves the right to make changes to Terms and Conditions of Sale without notice.

Terms and Conditions of Field Services Sale

All sales are subject to Det-Tronics' "Terms and Conditions of Field Services Sale" found at www.det-tronics.com.

Please visit the website frequently. Det-Tronics reserves the right to make changes to Terms and Conditions of Field Services Sale without notice.

REFERENCES

Limited Warranty

Det-Tronics makes the following limited warranty: Det-Tronics warrants that the Equipment represented by this contract shall be free from defects in material and workmanship upon delivery (the “**Limited Warranty**”). If such Equipment is not as warranted within **eighteen (18) months after date of manufacture, or within twelve (12) months after date of installation, whichever occurs first**, as evidenced by a certification by the installer, Det-Tronics’ liability and Buyer’s exclusive remedy will be limited to the repair or replacement of the defective Equipment, but shall not include any additional testing or taxes on the repaired or replaced goods. If, after inspection of the returned Equipment, Det-Tronics determines that the defect is a result of damage, misuse, mishandling, installation, abnormal conditions of storage or operation, unauthorized repair or modification, or due to Buyer’s failure to install, maintain, or operate the Equipment in compliance with the written instructions, all expenses incurred by Det-Tronics in connection with the replacement or repair of the Equipment shall be the responsibility of Buyer. Any Equipment returned to Det-Tronics for replacement shall become the property of Det-Tronics. Any part, item or Equipment repaired or replaced and returned to Buyer shall be warranted by Det-Tronics for the remainder of the original warranty period.

EXTENDED WARRANTY: The following warranty periods shall only apply for the specific products listed below (collectively, the “**Extended Warranties**”):

- a. Sixty (60) months from the date of manufacture:
 - i. FlexSight™ LS2000 Line-of-Sight Infrared Gas Detector (plus a 10-year warranty for the IR source)
 - ii. FlexVu® UD10 Universal Display Unit
 - iii. Model X3301 Multispectrum IR Flame Detector
 - iv. Model X3302 Multispectrum IR Flame Detector
 - v. PointWatch Eclipse® Model PIRECL IR CO2 Gas Detector
 - vi. PointWatch Eclipse® Model PIRECL IR Hydrocarbon Gas Detector

- b. Thirty-six (36) months from the date of manufacture:
 - i. AC100 and ATX10 Acoustic Detector
 - ii. X2200 UV Flame Detector
 - iii. X5200 UVIR Flame Detector
 - iv. X9800 Single Frequency IR Flame Detector

Limited Warranties and Extended Warranties do not apply to cosmetic damage, such as scratches, paint fading, nicks and dents due to the normal use of the product or operation under severe environment conditions.

All Limited Warranty and Extended Warranty claims shall be made within ten (10) days of expiration of the applicable warranty period.

THE FOREGOING WARRANTIES ARE THE SOLE AND EXCLUSIVE WARRANTIES GIVEN BY DET-TRONICS IN CONNECTION WITH THE SERVICES PERFORMED AND PRODUCTS PROVIDED HEREUNDER, AND ARE IN LIEU OF ALL OTHER WARRANTIES OF ANY KIND, WHETHER EXPRESS OR IMPLIED, ORAL OR WRITTEN, WHICH ARE HEREBY DISCLAIMED AND EXCLUDED BY DET-TRONICS, INCLUDING WITHOUT LIMITATION ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE. ANY ADDITIONAL WARRANTIES OR REPRESENTATIONS MADE BY EMPLOYEES, REPRESENTATIVES OR AGENTS OF DET-TRONICS WHICH ARE NOT EXPRESSLY INCLUDED IN THE LIMITED WARRANTY, EXTENDED WARRANTIES OR FIELD SERVICE WARRANTIES ARE EXCLUDED AND DISCLAIMED BY DET-TRONICS.

Ordering Information

Pricing and availability:

**Detector Electronics Corporation
6901 West 110th Street
Minneapolis, Minnesota 55438 USA
+952-946-6491 or 1-800-765-3473
det-tronics@det-tronics.com**

Order placement:

**Send Purchase Orders to:
orders@det-tronics.com
or
Fax: +952-829-8750**

Det-Tronics reserves the right to make substitutions or changes to products, prices, or terms and conditions without notice.

Pricing and payments are payable in U.S. Dollars. Delivery is FCA, Minneapolis, Minnesota, USA. Risk of loss and title shall transfer to Buyer at delivery to the first carrier. Prices shown do not include V.A.T., federal, state or local taxes, or customs duty. Custom export crating will be quoted upon request.

Prices are effective for orders placed after January 1, 2019.

Payment terms are subject to Det-Tronics' approval.

Returns require prior authorization and a Return Material Authorization (RMA) number. Returns are subject to a minimum restocking fee of 30% current product price. The restocking fee is determined by Det-Tronics, based upon condition and age of authorized returned product. Contact Det-Tronics for RMA numbers and additional information.

Expedited Shipments

Any order received and accepted, requesting same day shipment, will be treated as an "expedited shipment." There will be a minimum charge for "expedited shipments" of \$350 and an additional 10% expediting charge for all counter-to-counter rush orders. Detector Electronics cannot guarantee same day shipment for orders placed after 3:00 PM CST or non-domestic delivery addresses.

DISCLAIMER

Any technical assistance, recommendations or suggestions provided by Detector Electronics Corporation (Det-Tronics) as to the number or placement of any devices in any particular installation are provided for informational purposes only and are dependent upon there having been full, complete and accurate information provided to Det-Tronics. The end user (Owner) and the installer are the ultimate decision makers and are responsible to ensure that the actual installation is fully compliant with all local codes, rules and regulation, is fully approved by the authority having jurisdiction, and achieves the desired performance. Det-Tronics' recommendations do not account for the unreported presence of disturbing elements (e.g., walls, partitions, solid objects, obstacles, wind, etc.) and cannot account for future changes to site conditions.

Calibration Certificate	No Charge
Certificate of Guarantee/Warranty	No Charge
Certificate of Quality	No Charge
Compliance/Conformance Certificate	No Charge
Test and Inspection Certificate	No Charge
Consularized Documents	Consult Factory
Custom Certificates (Require Part Number and/or Serial Numbers etc)	\$170.00
Dossiers/Binders - Consisting of:	
Index	
Test Data	
Product Specification Sheet	\$900.00 per set
Product Manual	
Product Catalog	
Any additions to above	Consult Factory
Drawings:	
Product Detail Drawing per product	\$900.00
Spare Parts List per product	\$900.00
Custom Drawings	\$900.00
Any additions to above	Consult Factory
Product Manuals - Additional	\$3.00
Test Data	\$170.00
Courier of Documents (Letter Envelope only):	
Domestic (within U.S.)	\$55.00
International	\$85.00

Note: The above prices are not discountable.

Miscellaneous Charges

	Each
Assembly of product with another product Example: Transmitter and Sensor	\$300.00 per set
Paper Tags (P/N = PAPER TAGS)	\$24.00
Stainless Steel Tags (P/N = SS TAG INCLUDED)	\$35.00
Stainless Steel Tags Attached (P/N = SS TAG ATTACHED 1X2)	\$75.00
Stainless Steel Tags Attached & Dip Switch (P/N = SS TAG ATT & DS)	\$85.00

Example: SS Tag (\$35) + Labor (\$40) = Total (\$75)

Inspection at factory	Add \$2000 to orders up to \$250,000. Please consult the factory for Inspections of orders greater than \$250,000 (This is based on a local inspector.)
Engineering testing for gas curves (must pre-qualify)	\$200

Det-Tronics may not accept some items for testing, such as hazardous, toxic, carcinogenic, pyrophoric, or hypergolic materials. In this case, an estimated gas curve may be provided based upon the Safety Data Sheet (S.D.S.), previous test data and engineering judgement. All requests for testing must be accompanied with an S.D.S for that material before any shipment of the material is made. Recent Minnesota State law also may preclude Det-Tronics from accepting or handling certain hazardous materials. Following is the recommended procedure for requests gas curve testing:

1. The request for gas curve testing, complete with appropriate S.D.S., should be issued to Det-Tronics Customer Service Dept. A purchase order issued to Det-Tronics for testing services will be required upon request approval.
2. A one ounce sample of liquids or 7.5 liters of gaseous materials shall be packaged and shipped in the appropriate container to the attention of: Gas Sensor gas curve Test Lab.
3. A Material Safety Data Sheet must accompany each sample to be tested.
4. Technical information typically required for each compound includes: specific gravity, molecular weight, vapor density, flashpoint, and lower and upper flammability limit.
5. All sample materials will be returned to the customer after test completion for proper disposal.
